Farmline Lexington Books

This series of fifteen books - The Food Service Professional Guide TO Series from the editors of the Food Service Professional magazine are the best and most comprehensive books for serious food service operators available today. These step-by-step guides on a specific management subject range from finding a great site for your new restaurant to how to train your wait staff and literally everything in between. They are easy and fast-to-read, easy to understand and will take the mystery out of the subject. The information is boiled down to the essence. They are filled to the brim with up to date and pertinent information. The books cover all the bases, providing clear explanations and helpful, specific information. All titles in the series include the phone numbers and web sites of all companies discussed. What you will not find are wordy explanations, tales of how someone did it better, or a scholarly lecture on the theory. Every paragraph in each of the books are comprehensive, well researched, engrossing, and just plain fun-to-read, yet are packed with interesting ideas. You will be using your highlighter a lot! The best part aside from the content is they are very moderately priced. The whole series may also be purchased the ISBN number for the series is 0910627266. You are bound to get a great new idea to try on every page if not out of every paragraph. Do not be

put off by the low price, these books really do deliver the critical information and eye opening ideas you need to succeed without the fluff so commonly found in more expensive books on the subject. Highly recommended! Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. Founded over twenty years ago in the company president's garage, Atlantic Publishing has grown to become a renowned resource for non-fiction books. Today, over 450 titles are in print covering subjects such as small business, healthy living, management, finance, careers, and real estate. Atlantic Publishing prides itself on producing award winning, high-quality manuals that give readers up-to-date, pertinent information, real-world examples, and case studies with expert advice. Every book has resources, contact information, and web sites of the products or companies discussed.

Commodity checkoff programs have become an increasingly important way for U.S. agricultural producers to advertise and promote their products, both domestically and in foreign markets. Checkoffs - mandatory assessments of producers - fund generic advertising and promotion programs to expand and develop commodity markets. In Commodity Advertising, Olan D. Forker and Ronald W. Ward develop the terminology and set forth the economic theory of commodity advertising, as well as the legal and industrial structures necessary to underwriting commodity programs. Forker and Ward offer methods for evaluating the economic effectiveness of commodity programs, suggest techniques for integrating advertising and promotion expenditures into demand analysis, and propose a new method for estimating the functional relationship between advertising expenditures and expected sales response - one that provides a

more realistic estimate of the shape of the advertising response function. They also present case studies on the advertising programs for fluid milk, beef, apples, citrus, wool, fresh tomato, catfish, potatoes, soybean, cheese, and fats and oils. Commodity Advertising demonstrates that like their brand counterparts, generic advertising programs do have a positive impact on consumer demand. While the impact varies among commodity groups, research indicates that well planned and executed generic advertising can yield benefits to the producers who fund the programs as well as the processors and consumers of the commodity. The authors treat advertising as information, and they present methods to estimate the value of this information to consumers and to the commodity industry. In general, advertising yields greater benefits to the producers of the commodity when the industry's supply response is inelastic. But many other factors, including product quality, funding base, pricing, available substitutes, and consumer preferences influence the ability of commodity advertising programs to be effective. The authors discuss the influence on commodity demand of all these factors. The book will interest both agricultural and many nonagricultural groups, including academic, nonprofit, and governmental associations, businesses, and others who wish to explore the opportunities created by generic advertising and promotion efforts.
