Pirate Polly's Potty Lyrical Press

After fleeing their homeland, Australian refugee policies threaten to tear this young couple apart. An unforgettable story of love, hope and a quest for freedom. At seventeen, all Mojgan Shamsalipoor wanted was to be safe from physical and sexual abuse, go to school, and to eventually marry for love. In Iran, she was denied all of this. Milad Jafari was a shy teenage boy who found his voice as a musician. But the rap music he loved was illegal in his country. All Milad's father, a key maker, builder and shopkeeper, wanted was for his family to live free from the fear of arrest, imprisonment or execution. To do that they all had to flee Iran. Mojgan and Milad met in Australia. But in the months between their separate sea voyages, the Australian government changed the way asylum seekers were treated. Though Milad is recognised as a refugee and will soon become a proud Australian citizen, Mojgan has been told she cannot stay here even though the threat of imprisonment and further abuse, or worse, means she can't return to Iran. UNDER THE SAME SKY, is a powerful insight into the human face of asylum seekers and the way history has shaped the lives of these two young people. It also shows the compassion alive in our suburbs. For Mojgan and Milad, their love keeps their hopes alive.

Astromouse NorthSouth Books

First published 1999, this book attempts to answer these questions and takes a broad approach to the subject of "Childhood and Trauma". It examines in detail separation, sexual abuse and war, all of which are particularly traumatizing to children, and how they are dealt with in different cultures. In addition to describing the causes and impacts of trauma, the book also gives special attention to healing and helping traumatized children. One chapter deals solely with how to support professional caregivers who live and work with affected children. Another aim of the book is to use the practical experience of SOS Children's Villages to illustrate the possibilities and limits of professional care and therapy for traumatized children. The Book comprises a total of 17 articles provided by authors from eight different countries and pursues both a practical and theoretical approach to the problems mentioned above. "Children and Trauma" is intended for psychologists, psychotherapists, educators, social workers as well as a broader audience of professional caregivers and anyone interested in the subject.

In 6 ganz unterschiedlichen Abenteuergeschichten (Besprechung der deutschen Ausgabe in BA 10/99) erleben Kinder alltagsnahe, spannende Situationen diesmal auf Englisch. Die Fortsetzung der Reihe "Englisch lernen mit den Leselöwen ..." (3 weitere Titel in dieser Nr.) setzt weiterhin auf das Rezept, erprobte Kinderlektüre ins Englische zu übersetzen. Ein "fire alarm" hält Stefan auf Trab, Tina und Laura werden im Zelt von "Shadows in the night" erschreckt oder Jana wünscht sich eine "moon rocket" zum Geburtstag. Weniger gebräuchliche Worte, im Text blau gedruckt, werden am Rand Verben in der konjugierten Form übersetzt. Der jedem Band beigefügte, ausklappbare Themenwortschatz ist in diesem Fall aufgrund der Themenvielfalt etwas willkürlich und reicht von airbed (Luftmatratze) über aircraft factory (Flugzeugfabrik) bis zu genie (Flaschengeist), im Wörterbuch im Anhang finden sich die wichtigsten Vokabeln. Die einfache Syntax und die textbegleitenden Illustrationen von Wilfried Gebhard erleichtern das Textverständnis. Als Lektüre für fortgeschrittenere Englischlerner im Grundschulalter empfohlen.. Sechs spannende Abenteuergeschichten auf Englisch für Neugierige, die schon gute Grundkenntnisse haben.

The Wild Pack Devises a Plan HarperCollins UK

From the New York Times bestselling author of the Legend series I am tired of being used, hurt, and cast aside. Adelina Amouteru is a survivor of the blood fever. A decade ago, the deadly illness swept through her nation. Most of the infected perished, while many of the children who survived were left with strange markings. Adelina's black hair turned silver, her lashes went pale, and now she has only a jagged scar where her left eye once was. Her cruel father believes she is a malfetto, an abomination, ruining their family's good name and standing in the way of their fortune. But some of the fever's survivors are rumored to possess more than just scars—they are believed to have mysterious and powerful gifts, and though their identities remain secret, they have come to be called the Young Elites. Teren Santoro works for the king. As Leader of the Inquisition Axis, it is his job to seek out the Young Elites, to destroy them before they destroy the nation.

He believes the Young Elites to be dangerous and vengeful, but it's Teren who may possess the darkest secret of all. Enzo Valenciano is a member of the Dagger Society. This secret sect of Young Elites seeks out others like them before the Inquisition Axis can. But when the Daggers find Adelina, they discover someone with powers like they've never seen. Adelina wants to believe Enzo is on her side, and that Teren is the true enemy. But the lives of these three will collide in unexpected ways, as each fights a very different and personal battle. But of one thing they are all certain: Adelina has abilities that shouldn't belong in this world. A vengeful blackness in her heart. And a desire to destroy all who dare to cross her. It is my turn to use. My turn to hurt.

Given the myriad exhaust compounds and the corresponding problems that they can pose in an exhaust management system, the proper choice of such systems is a complex task. Presenting the fundamentals, technical details, and general solutions to real-world problems, Semiconductor Industry: Wafer Fab Exhaust Management offers practical guidance on selecting an appropriate system for a given application. Using examples that provide a clear understanding of the concepts discussed, Sherer covers facility layout, support facilities operations, and semiconductor process equipment, followed by exhaust types and challenges. He reviews exhaust point-of-use devices and exhaust line requirements needed between process equipment and the centralized exhaust system. The book includes information on wet scrubbers for a centralized acid exhaust system and a centralized ammonia exhaust system and on centralized equipment to

control volatile organic compounds. It concludes with a chapter devoted to emergency releases and a separate chapter of examples illustrating these systems in use. Drawing on the author's 20 years of industry experience, the book shows you how to customize strategies specific to your needs, solve current problems, and prevent future issues in your exhaust management systems.
