The ubiquitous nature of transport signs on roadways, railways, and in airports can lead to an overload of visual information, yet little research has been done to understand the design and use of such signs from a driver's perspective. The Human Factors of Transport Signs explores key transport sign research and examines new technologies

Perhaps nothing in all of literature has caused such controversy as the Dark Lady

of the Shakespeare Sonnets. Who was she? How did she meet Shakespeare? How did their romance go wrong? Who was the young friend, the third corner of the famous love triangle? What was the effect of that romance on Shakespeare as a person and on his subsequent writings? The Shakespeare Sonnets give us only a single point of view, and an incomplete version of the story. This novel gives something never before examined. Exactly what happened and when and why . . . through the eyes of the Dark Lady herself. IAENG Transactions on Engineering Sciences W. W. Smart cities and villages have enhanced the quality of lives of residents. Various computer-assisted technologies have been harnessed for the development of smart cities and villages in order to provide solutions for common and niche urban

problems. The development of smart environments has been possible due on advances in computing power and artificial intelligence (AI) that have allowed the deployment of scalable technologies. Artificial Intelligence for Smart Cities and Smart Villages: Advanced Technologies, Development, and Challenges summarizes the role of AI in planning and designing smart solutions for urban and rural environments. This book is divided into three sections to impart a better understanding of the topics to readers. These sections are: 1) Demystifying smart cities and villages: A traditional perspective, 2) Smart innovations for rural lifestyle management solutions, and 3) Case studies. Through this book, readers will be able to understand various advanced technologies that are vital to the development of smart cities and villages.

The book presents 15 chapters that present effective solutions to urban and rural challenges. Concepts highlighted in chapters include smart farms, indoor object classification systems, smart transportation, blockchains for medical information, humanoid robots for rural education, IoT devices for farming, and much more. This book is intended for undergraduate and graduate engineering students across all disciplines, security providers in the IT and related fields, and trainees working for infrastructure management companies. Researchers and consultants at all levels working in the areas of artificial intelligence, machine learning, IoT, blockchain, network security, and cloud computing will also find the contents beneficial in planning projects involving smart environments.

Saudi Arabia is at an early stage of its demographic transition to an older population, and so it has an opportunity to prepare early for a rising noncommunicable disease (NCD) epidemic. NCDs, such as cancers, cardiovascular diseases, diabetes, and chronic respiratory diseases and their associated behavioral risk factors—tobacco use, unhealthy diet, and physical inactivity—are an increasing economic and public health challenge. An aging population is expected to significantly increase the prevalence of NCDs and the related demand for costlier health care services. Interventions and reforms to prevent NCDs, and to minimize current and future treatment costs, are needed now, particularly if Saudi Arabia is to achieve the Vision 2030 goal of increasing life expectancy from 75 years in 2021 to 80 years in 2030. To support strategic planning efforts, *Noncommunicable Diseases in Saudi Arabia: Toward Effective Interventions for Prevention* assesses the latest evidence on the prevalence and risk factors; explores the health and economic burden of NCDs, as well as their impact on human capital; and identifies key gaps in prevention efforts and ways to address these gaps. The book discusses the need for a national master plan for NCD prevention—one that is selective and targeted, with a particular focus on improving the implementation of cost-effective interventions and achieving results. To be successful, the national master plan will need to take into account the roles of the different stakeholders and their likely responsibilities in implementation. The book will be of interest to all those who work on NCDs in Saudi Arabia and beyond.

Green Sands is Kirk's chronicle of her life in the desert, told with exceptional candor and detail. Local Bedouins, foreign farm workers and their families, Saudi royalty, assorted Westerners, and fellow Americans share their desert world with Kirk. Her sincere curiosity, empathy, and warmth toward these new friends make her story entertaining as well as enlightening. There is a freshness to Kirk's perspective that puts the reader squarely in her shoes as she struggles to assimilate a culture so alien to her own and to embrace an adventure that few have the chance to experience. Martha Kirk shows her pioneering Texas spirit in the pages of *Green Sands* as she gamely kills camel spiders in the house, bravely risks imprisonment while driving the farm's pickup truck, and lovingly shares meals with Bedouin women and their children. *Artificial Intelligence for Smart Cities and Villages: Advanced Technologies, Development, and Challenges* Springer Nature

It is a woman's perspective on life in the Kingdom, and there is no question that the "d" restrictions, that is, dress, demeanor, and driving, weigh more heavily on the Western woman than the Western man. And it is compounded by that wonderfully fuzzy and gray era on quasi-legal work. Cuddihy was in that sub-set, with the right personality, to rise to the challenge. She decided to explore, and come to terms with the world around her. At some level, it would seem self-evident, but success lay in breaking out of the endless griping and gossiping of the company coffee klatches. She (and her husband) made non-company friends, explored Riyadh, took up tennis, learned Arabic, and even more seemingly bizarre, certainly from the point of view of other members of the compound, sought out Saudi friends... *United States Army Reserve in Operation Desert Storm* Bentham Science Publishers This book represents the twelfth edition of the IMPORTANT leading reference work MAJOR COMPANIES OF All company entries have been entered in MAJOR THE ARAB WORLD. Urban Transport XX contains the proceedings of the 20th International Conference on Urban Transport and the Environment. Transportation in urban areas, with its related environmental and social impacts, is a topic of significant concern for policymakers in both municipal and central government and for the urban citizens who need effective and efficient transport systems. Urban transport systems require considerable studies to devise and then safeguard their operational use, maintenance and operational safety. Transportation systems produce significant environmental impacts and can enhance or degrade the quality of life in urban centres. Clearly the challenge of providing effective and efficient transport systems in urban settings remains an acute challenge with financial, political and environmental constraints limiting the ability of transport system planners and operators to deliver the high quality outcomes expected by the public. Topics covered include: Transport Strategies; Public Transport Systems; Environmentally Friendly Transport Modes; Pedestrians and Traffic; Environmental Impact; Intelligent Transport Systems; Transport Safety and Security; Infrastructure; Experiences from Emerging Countries; Land use and Transport Integration.

*Anywhere But Saudi Arabia!* CRC Press What role does language and communication play in conflict? Why do people engage in or get drawn into quarrels? How can our awareness of the

social rules of language use prevent disputes? In this illuminating and accessible guide, Karol Janicki takes the reader on a tour through the field of conflict in language. Using real-life examples, the book examines how language usage influences conflict, and what people can do to avoid or resolve it. *Language and Conflict* - Ends each chapter with a story that neatly summarizes the key discussion points in a clear, digestible format - Provides useful 'hands-on' tips and further reading recommendations for those who want to explore the subject further. This book is ideal reading for undergraduates studying discourse analysis, language and communication, sociolinguistics, or applied linguistics, and for general readers new to the subject of language and conflict.

This book includes selected papers from the International Conference on Data Science and Intelligent Applications (ICDSIA 2020), hosted by Gandhinagar Institute of Technology (GIT), Gujarat, India, on January 24-25, 2020. The proceedings present original and high-quality contributions on theory and practice concerning emerging technologies in the areas of data science and intelligent applications. The conference provides a forum for researchers from academia and industry to present and share their ideas, views and results, while also helping them approach the challenges of technological advancements from different viewpoints. The contributions cover a broad range of topics, including: collective intelligence, intelligent systems, IoT, fuzzy systems, Bayesian networks, ant colony optimization, data privacy and security, data mining, data warehousing, big data analytics, cloud computing, natural language processing, swarm intelligence, speech processing, machine learning and deep learning, and intelligent applications and systems. Helping strengthen the links between academia and industry, the book offers a valuable resource for instructors, students, industry practitioners, engineers, managers, researchers, and scientists alike.

Who's Who in the Arab World 2007-2008 compiles information on the most notable individuals in the Arab world. Additionally, the title provides insight into the historical background and the present of this influential and often volatile region. Part I sets out precise biographical details on some 6,000 eminent individuals who influence every sphere of public life in politics, culture and society. Part II surveys the 19 Arab Countries, providing detailed information on the geography, history, constitution, economy and culture of the individual countries. Part III provides information on the historical background of the Arab world. Indexes by country and profession supplement the biographical section. A select bibliography of secondary literature on the Middle East is also included.

The Saudi royal family has survived the events of the Arab Spring intact and unscathed. Any major upheavals were ostensibly averted with the help of oil revenues, while the Kingdom's influential clerics conveniently declared all forms of protest to be against Islam. Saudi dollars bent events to the Kingdom's will in the Arab world-particularly in Syria, Yemen and Bahrain, but also in Egypt and Lebanon, Saudi cash has had a profound impact. Does this mean that all is well in Saudi Arabia itself, which has an extremely youthful population ruled by a gerontocracy? Problems endemic in Egypt, Tunisia and Syria-youth unemployment, corruption and repression-are also evident in the Kingdom and while young Saudis may not yet be taking to the streets, on Twitter and Facebook their discontent is manifest. Saudi Arabia remains the dominant player in the Gulf, and the fall of the House of Saud would have explosive repercussions on the GCC while the knock-on effect worldwide would be immeasurable. Saudi Arabia is the only oil exporter capable of acting as a 'swing producer', a fact of which this book reminds us. Aarts and Roelants have drawn a compelling picture of a Middle East power which, while not presently endangered, may soon deviate from the trajectory established by the House of Saud.
