Survival of the City Routledge

In the context of what begins as a lengthy critique of classic Roman religion and a defense of Christianity, Augustine touches upon numerous topics, including the role of grace, the original state of humanity, the possibility of waging a just war, the ideal form of government, and the nature of heaven and hell.

How the City of London Works Kogan Page Publishers

Kevin Lynch's books are the classic underpinnings of modern urban planning and design, yet they are only a part of his rich legacy of ideas about human purposes and values in built form. *City Sense* and *City Design* brings together Lynch's remaining work, including professional design and planning projects that show how he translated many of his ideas and theories into practice. An invaluable sourcebook of design knowledge, *City Sense* and *City Design* completes the record of one of the foremost environmental design theorists of our time and leads to a deeper understanding of his distinctively humanistic philosophy. The editors, both former students of Lynch, provide a cogent summary of his career and of the role he played in shaping and transforming the American urban design profession during the 1950s, the 1960s, and the 1970s. Each of the seven thematic groupings of writings and projects that follow begins with a short introduction explaining their content and their background. The essays in part I focus on the premises of Lynch's work: his novel reading of large-scale built environments and the notion that the design of an urban landscape should be as meaningful and intimate as the natural landscape. In part II, excerpts from Lynch's travel journals reveal his early ideas on how people perceive and interpret their surroundings—ideas that culminated in his seminal work, *The Image of the City*. This part of the book also presents Lynch's experiments with children and his assessment of environmental-perception research. The examples of both small-scale and large-scale analysis of visual form in part III are followed by three parts on city design. These include

Lynch's more theoretical works on complex planning decisions involving both functional (spatial and structural organization) and normative (how the city works in human terms) approaches, articles discussing the principles that guided Lynch's teaching and practice of city design, and descriptions of Lynch's own projects in the Boston area and elsewhere. The book concludes with essays written late in Lynch's career, fantasy pieces describing utopias and offering new design freedoms and scenarios warning of horrifying "cacotopias."

A collection of essays—historical and personal—about the present and future of American cities Edited by Keith Gessen and Stephen Squibb, *City by City* is a collection of essays—historical, personal, and somewhere in between—about the present and future of American cities. It sweeps from Gold Rush, Alaska, to Miami, Florida, encompassing cities large and small, growing and failing. These essays look closely at the forces—gentrification, underemployment, politics, culture, and crime—that shape urban life. They also tell the stories of citizens whose fortunes have risen or fallen with those of the cities they call home. A cross between Hunter S. Thompson, Studs Terkel, and the Great Depression-era WPA guides to each state in the Union, *City by City* carries this project of American storytelling up to the days of our own Great Recession.

Hopkins's 'Dublin Notebook' provides intimate and rare access to the Jesuit poet's private, poetic, religious, and academic thoughts and words during his final years in Dublin. In February 1884, Hopkins moved to Dublin from England to become a Professor of Classics at University College (entrusted to the Jesuits in 1883) and a Fellow at the recently-established Royal University of Ireland, an examining institution. He lived at UC's St. Stephen's Green campus until 8 June 1889, when he died of typhoid. The 'Dublin Notebook' is a unique repository of personal memoranda,

drafts of poems, lecture outlines, spiritual meditation notes, and academic notes, and sheds new light on the circumstances that produced Hopkins's 'Sonnets of Desolation' in the mid-1880s. The contents include pages in which he tallied examination marks and commented on students' performances; intermittent musical jottings; lists of correspondents to whom he owed letters; attendance records; drafts of a short biography for publication; a commentary on Cicero; and preliminary versions of 'Sibyl's Leaves', one of his most exceptional poems. This edition, Volume VII in the *Collected Works of Gerard Manley Hopkins*, provides readers with a digitized facsimile of the manuscript, a detailed transcription of each page, and scholarly resources such as a historical and cultural introduction to Hopkins's Dublin years; an analysis of the notebook's contents; the editors' explanation of the manuscript and its challenges; translations of and citations for all classical quotations; and thorough annotations (including transcriptions of his musical compositions). Other resources include a Biographical Register; documents related to Hopkins's academic appointments; sample examinations that he set for the Royal University; and edited versions of his study of Cicero's 'On Duty' and his biographical notice of Richard Watson Dixon, the Pre-Raphaelite poet. The 'Dublin Notebook' sheds new light on Hopkins's life and inner torments, his wide-ranging artistic talents (and musical aspirations), his involvement in Ireland's vexed 'troubles' in the late nineteenth century, his harrowing spiritual and emotional condition, and the busy life of a burdened Classics professor.

AN INSTANT NEW YORK TIMES BESTSELLER! From the # 1 New York Times bestselling author of *Eat Pray Love* and *The Signature of All Things*, a delicious novel of glamour, sex, and adventure, about a young woman discovering that you don't have to be a good girl to be a good person. "A spellbinding novel about love, freedom, and finding your own happiness." - PopSugar "Intimate and richly sensual, razzle-dazzle with a hint of danger." -USA Today "Pairs well with a cocktail...or two." -TheSkimm "Life is both

fleeting and dangerous, and there is no point in denying yourself pleasure, or being anything other than what you are." Beloved author Elizabeth Gilbert returns to fiction with a unique love story set in the New York City theater world during the 1940s. Told from the perspective of an older woman as she looks back on her youth with both pleasure and regret (but mostly pleasure), *City of Girls* explores themes of female sexuality and promiscuity, as well as the idiosyncrasies of true love. In 1940, nineteen-year-old Vivian Morris has just been kicked out of Vassar College, owing to her lackluster freshman-year performance. Her affluent parents send her to Manhattan to live with her Aunt Peg, who owns a flamboyant, crumbling midtown theater called the Lily Playhouse. There Vivian is introduced to an entire cosmos of unconventional and charismatic characters, from the fun-chasing showgirls to a sexy male actor, a grand-dame actress, a lady-killer writer, and no-nonsense stage manager. But when Vivian makes a personal mistake that results in professional scandal, it turns her new world upside down in ways that it will take her years to fully understand. Ultimately, though, it leads her to a new understanding of the kind of life she craves - and the kind of freedom it takes to pursue it. It will also lead to the love of her life, a love that stands out from all the rest. Now eighty-nine years old and telling her story at last, Vivian recalls how the events of those years altered the course of her life - and the gusto and autonomy with which she approached it. "At some point in a woman's life, she just gets tired of being ashamed all the time," she muses. "After that, she is free to become whoever she truly is." Written with a powerful wisdom about human desire and connection, *City of Girls* is a love story like no other.

Between 1999 and 2002 the National Endowment for the Arts's New Public Works program sponsored design competitions in cities across the United States. The forward-thinking designs that emerged have influenced the physical form of major public works projects nationwide. *New Public Works* presents a history of the program, along with interviews with participants. Special attention is paid to the key role played by private, municipal, and other public funding sources. Case studies of three built projects by Allied Works Architecture, Koning Eizenberg, and Weiss/Manfredi Architecture describe the path of each from competition through construction.

Cities are a big deal. More people now live in them than don't, and with a growing world population, the urban jungle is only going to get busier in the coming decades. But how often do we stop to think about what makes our cities work? Cities are built using some of the most creative and revolutionary science and engineering ideas - from steel structures that scrape the sky to glass cables that help us communicate at the speed of light - but most of us are too busy to notice. *Science and the City* is your guidebook to that hidden world, helping you to uncover some of the remarkable technologies that keep the world's great metropolises moving. Laurie Winkless takes us around cities in six continents to find out how they're dealing with the challenges of feeding, housing, powering and connecting more people than ever before. In this book, you'll meet urban pioneers from history, along with today's experts in everything from roads to time, and you will uncover the vital role science has played in shaping the city around you. But more than that, by exploring cutting-edge research from labs across the world, you'll build your own vision of the megacity of tomorrow, based on science fact rather than science fiction. *Science and the City* is the perfect read for anyone curious about the world they live in.

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

What Is the World Made Of? Penguin

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Making Cities Work brings together leading writers and scholars on urban America to offer critical perspectives on how to sustain prosperous, livable cities in today's fast-evolving economy. Successful cities provide jobs, quality schools, safe and clean neighborhoods, effective transportation, and welcoming spaces for all residents. But cities must be managed well if they are to remain attractive places to work, relax, and raise a family; otherwise residents, firms, and workers will leave and the social and economic advantages of city living will be lost. Drawing on cutting-edge research in the social sciences, the contributors explore optimal ways to manage the modern city and propose solutions to today's most pressing urban problems. Topics include the urban economy, transportation, housing and open space, immigration, race, the impacts of poverty on children, education, crime, and financing and managing services. The contributors show how to make cities work for diverse urban constituencies, and why we still need cities despite the many challenges they pose. Making Cities Work brings the latest findings in urban economics to policymakers, researchers, and students, as well as anyone interested in urban affairs. In addition to the editor, the contributors are David Card, Philip J. Cook, Janet Currie, Edward L. Glaeser, Joseph Gyourko, Richard J. Murnane, Witold Rybczynski, Kenneth A. Small, and Jacob L. Vigdor.
