### Achievement and Inclusion in Schools

African Books Collective

This volume presents, for the first time, evidence for non-royal consanguineous marriage in ancient Egypt. The evidence was collated from select sources from the Middle Kingdom to the Roman Period, and it has been used to investigate the potential economic and

biological outcomes, particularly beyond the level of sibling and half-sibling unions.

Forced Marriage and 'Honour' Killings in Britain Cuvillier Verlag

This three-volume work presents the proceedings from the 19th International Ship and Offshore Structures Congress held in Cascais, Portugal on 7th to 10th September 2015. The International Ship and Offshore Structures Congress (ISSC) is a forum for the exchange of information by experts undertaking and

applying marine structural research. The aim of

**Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes** Academic Press

This book constitutes the refereed proceedings of the 13th International Conference on Blended Learning, ICBL 2020, held in Bangkok, in August 2020. The 33 papers presented were carefully reviewed and selected from 70 submissions. The conference theme of ICBL 2020 is Blended Learning : Education in a Smart Learning Environment. The papers are organized in topical sections named: Blended Learning, Hybrid Learning, Online Learning, Enriched and Smart Learning, Learning Management System and

Content and Instructional Design.

'Blood Is Thicker Than Water' – Non-Royal Consanguineous Marriage in Ancient Egypt CRC Press

Before today's teachers are ready to instruct the intellectual leaders of tomorrow, they must first be trained themselves. Information and communication technology can greatly increase the effectiveness of this training and also aid teachers as they seek to bring the latest technological advancements into their own classrooms. The Handbook of Research on Enhancing Teacher Education with Advanced Instructional Technologies explains the need to bring technology to the forefront of teacher training. With an emphasis on how information and communication technology can provide

richer learning outcomes, this book is an essential reference source for researchers, academics, professionals, students, and technology developers in various disciplines.

*ECEL2013- Proceedings for the 12th European Conference on eLearning*  
National Academies Press

This proceedings volume of the Challenging Glass 4 & COST Action TU0905 Final Conference, held 6-7 February 2014 at the EPFL in Lausanne, Switzerland, represents the Final Action Publication of the European research network COST Action TU0905 "Structural Glass - Novel design methods and next generation products". It contains nearly 100 peer-reviewed papers - published by more than 180 authors from 22 different countries - that focus on the

architectural and structural applications of glass in structures and facades. As such, it provides a profound state-of-the-art of structural glass design and engineering. A must-read for all architects, engineers, scientists, industry partners and other enthusiasts interested in this rapidly evolving and challenging domain.

Transformative Social Work Practice presents an innovative and integrative approach towards critically reflective practice with an interweaving of micro, mezzo, and macro applications to real world demands. The authors explore issues commonly addressed by social workers, including health, mental health, addictions, schools, and family and community violence, while challenging assumptions and promoting ethically-driven, evidence-based practice perspectives to advocate for social justice and reduce disparities. The book is about redefining social work practice to meet the current and complex needs of diverse and vulnerable individuals, families, and communities in order to enhance their strengths in an era of unprecedented technological growth,

globalization, and change.

*ECRM2013-Proceedings of the 12th European Conference on Research Methods* Frontiers Media SA

The Report examines the education impact of migration and displacement across all population movements: within and across borders, voluntary and forced, for employment and education. It also reviews progress on education in the 2030 Agenda for Sustainable Development. In view of increasing diversity, the report analyses how education can build inclusive societies and help people move beyond tolerance and learn to live together.

Advances in Agronomy, Volume 157,

continues to be recognized as a leading reference and first-rate source for the latest research in agronomy. Each volume contains an eclectic group of reviews by leading scientists throughout the world. As always, the subjects covered are rich, varied, and exemplary of the abundant subject matter addressed by this long-running serial. Includes numerous, timely, state-of-the-art reviews on the latest advancements in agronomy Features distinguished, well recognized authors from around the world Builds upon this venerable and iconic review series Covers the extensive variety and breadth of subject matter in the crop and soil sciences

University of Arizona Press

Interprofessional teamwork and collaborative practice are emerging as key elements of efficient and productive work in promoting health and treating patients. The vision for these collaborations is one where different health and/or social professionals share a team identity and work closely together to solve problems and improve delivery of care. Although the value of interprofessional education (IPE) has been embraced around the world - particularly for its impact on learning - many in leadership positions have questioned how IPE affects patient, population, and health system outcomes. This question cannot be fully answered without well-designed studies, and these studies cannot be conducted without an understanding of the

methods and measurements needed to conduct such an analysis. This Institute of Medicine report examines ways to measure the impacts of IPE on collaborative practice and health and system outcomes. According to this report, it is possible to link the learning process with downstream person or population directed outcomes through thoughtful, well-designed studies of the association between IPE and collaborative behavior. *Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes* describes the research needed to strengthen the evidence base for IPE outcomes. Additionally, this report presents a conceptual model for evaluating IPE that could be adapted to particular settings in which it is applied.

*Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes* addresses the current lack of broadly applicable measures of collaborative behavior and makes recommendations for resource commitments from interprofessional stakeholders, funders, and policy makers to advance the study of IPE.

The IAVSD Symposium is the leading international conference in the field of ground vehicle dynamics, bringing together scientists and engineers from academia and industry. The biennial IAVSD symposia have been held in internationally renowned locations. In

2015 the 24th Symposium of the International Association for Vehicle System Dynamics (IAVSD) was held in Graz, Austria, from 17th to 21st of August 2015. The symposium was hosted by VIRTUAL VEHICLE Research Center, in cooperation with the Graz and Vienna Universities of Technology, and the industrial partners AVL, Magna Steyr, and Siemens. 170 papers (oral and poster presentations) were presented at the symposium and the papers are now published in these proceedings. The papers review the latest research developments and practical applications in highly relevant areas of vehicle dynamics on roads and tracks, and may serve as a reference for researchers and engineers active in the field of vehicle system dynamics.

*Educational Assessment in Tanzania*

OECD Publishing

Child and Adolescent Psychopathology: A Casebook, Fifth Edition provides students with an opportunity to gain deeper insight into a wide range of disorders within the context of the diagnostic framework of the DSM-5. This supplemental textbook provides an abundance of "real life" cases which demonstrate methods in assessing and treating a wide spectrum of child and adolescent psychopathologies in a variety of settings. Each case presents an opportunity to practice and develop clinical skills in the assessment, diagnosis, and treatment of childhood disorders from a number of theoretical perspectives and at various levels of interest and expertise. The book

features current trends in assessment, diagnosis, treatment, and research. It is an ideal hands-on resource for a child and adolescent psychopathology course. The Fifth Edition includes a new case study on depression, expanded coverage of trauma-related disorders, a new glossary, and updated assessment materials and references throughout. MKUKUTA II Assessment Report (2010 - 2015) Walter de Gruyter GmbH & Co KG Community Secondary Schools are the majority secondary schools in Tanzania. These are schools built by community initiatives with the aim of helping more children acquire a secondary education. Despite this good intention, these schools face a number of challenges. One such challenge has to do with academic performance. This book

investigates this challenge. It examines the factors that contribute to students' poor performance in the community secondary schools in Tanzania to discern the main factors contributing to their poor performance. Many factors contribute to students' poor performance, such as lack of support from parents on educational issues, teachers' and students' attitudes and perceptions on education, inadequate learning and teaching materials and resources, learning and teaching environments, as well as lack of adequate motivation for teachers and students. This book explores these challenges and proposes future prospects to make such schools have efficient performance in Tanzania and other places of the world they are found.

Flipped Instruction: Breakthroughs in Research and Practice Archaeopress Publishing Ltd

The integration of technology into modern classrooms has enhanced learning opportunities for students. With increased access to educational content, students gain a better understanding of the concepts being taught. *Flipped Instruction: Breakthroughs in Research and Practice* is a comprehensive reference source for the latest scholarly perspectives on promoting flipped learning strategies, tools, and theories in classroom environments. Featuring a range of extensive coverage across innovative topics, such as student engagement, educational technologies, and online learning environments, this is an essential publication for educators,

professionals, researchers, academics, and upper-level students interested in emerging developments in classroom and instructional design.

**Ships and Offshore Structures XIX**  
CRC Press

Thoroughly updated to reflect the challenges of diversity in today's schools, this new edition of *Achievement and Inclusion in Schools* shows how high levels of inclusion can be entirely compatible with high levels of achievement and that combining the two is not only possible but also essential if all students are to have the opportunity to participate fully in education. Each chapter has been fully revised to reflect an understanding of inclusion as being concerned with the learning and participation of everyone in a changing

education policy context. Based on new case study research, this edition sets out to answer the following questions: Are there strategies which can raise the achievement of all students, while safeguarding the inclusion of others who are more vulnerable? How can schools ensure high levels of inclusion as well as high levels of achievement for everyone? How might research into these matters be carried out? With new case studies in this second edition that reflect the devolution of education policy in the four countries of the UK, this book addresses concerns about how schools can respond to differences between learners without marginalising some of them. It offers guidance to practitioners as well as those undertaking research on this important topic.

National Standards & Grade-Level Outcomes for K-12 Physical Education  
Frontiers Media SA

This book examines the special nature of English both as a global and a local language, focusing on some of the ongoing changes and on the emerging new structural and discoursal characteristics of varieties of English. Although it is widely recognised that processes of language change and contact bear affinities, for example, to processes observable in second-language acquisition and lingua franca use, the research into these fields has so far not been sufficiently brought into contact with each other. The articles in this volume set out to combine all these perspectives in ways that give us a better understanding of the changing

nature of English in the modern world. *The Delusion of Knowledge Transfer*  
Academic Conferences Limited  
This book explores the contemporary phenomenon of forced marriage and 'honour' killings in Britain. Set against a background of increasing 'honour'-based violence within the country's South Asian and Muslim Diasporas, the book traces the development of the 'honour' question over the past two decades. It accordingly witnesses unprecedented changes in public awareness and government policy including ground-breaking 'honour'-specific legislation and the criminalisation of forced marriage. All of which makes Britain an important context for the study of this now indigenous and self-perpetuating social problem. In considering the scale of the

challenge and its underlying causes, attention is paid to the intersections of gendered power structures that disadvantage female members of 'honour' cultures as well as feminist theories that seek to explain them. The book features five key case-studies of 'honour' killings and draws from a wide range of narratives including those of 'honour' violence survivors, grassroots service providers and legislators. Such myriad of perspectives reveals the complexity of the 'honour' issue and the deep ideological divisions that characterise it. With the UK's multiculturalist discourse unable to reconcile protecting patriarchal minority cultures with safeguarding gender equality and human rights, the book raises fundamental questions about the

country's future direction. Following a long trend of state-sponsored integrationist policies, the government's response to the 'honour' question points decisively in the direction of a post-multicultural British nation.

**Ending Discrimination Against People with Mental and Substance Use Disorders** Frontiers Media SA

The political contention that considers forests to be mere economic assets to achieve state welfare has slowly changed into a more conservative view since the Ninth World Forestry Congress in Mexico in 1985 rightly acknowledged that there has been severe tropical forest destruction and environmental deterioration around the globe.

**Post-Conflict Institutional Design** IGI Global

Nowadays, the degree and scale of flood hazards has been massively increasing as a result of the changing climate, and large-scale floods jeopardize lives and properties, causing great economic losses, in the inundation-prone areas of the world. Early flood warning systems are promising countermeasures against flood hazards and losses. A collaborative assessment according to multiple disciplines, comprising hydrology, remote sensing, and meteorology, of the magnitude and impacts of flood hazards on inundation areas significantly contributes to model the integrity and precision of flood forecasting. Methodologically oriented countermeasures against flood hazards may involve the forecasting of reservoir inflows, river flows, tropical cyclone

tracks, and flooding at different lead times and/or scales. Analyses of impacts, risks, uncertainty, resilience, and scenarios coupled with policy-oriented suggestions will give information for flood hazard mitigation. Emerging advances in computing technologies coupled with big-data mining have boosted data-driven applications, among which Machine Learning technology, with its flexibility and scalability in pattern extraction, has modernized not only scientific thinking but also predictive applications. This book explores recent Machine Learning advances on flood forecast and management in a timely manner and presents interdisciplinary

approaches to modelling the complexity of flood hazards-related issues, with contributions to integrative solutions from a local, regional or global perspective.

*Registries for Evaluating Patient Outcomes* SAGE Publications

The human aspect plays an important role in the social sciences. The behavior of people has become a vital area of focus in the social sciences as well. *Interdisciplinary Behavior and Social Sciences* contains papers that were originally presented at the 3rd International Congress on Interdisciplinary Behavior and Social Science 2014 (ICIBSoS 2014),
