 As RFID technology is becoming increasingly popular, the need has arisen to address the challenges and approaches to successful implementation. RFID and Auto-ID in Planning and Logistics: A Practical Guide for Military UID Applications presents the concepts for students, military personnel and contractors, and corporate managers to learn about RFID and other automatic information capture technologies, and their integration into planning and logistics functions. The text includes comparisons of RFID with technologies such as bar codes, satellite tags, and global positioning systems and provides a decision model for choosing the appropriate technology for a given application. By providing the histories, current use, and future applications of RFID and automatic identification technologies (AIT), the book discusses supply chain planning and logistics uses for these

technologies. It addresses the fundamental relationships in RFID, including how antennae, integrated circuitry, and substrate work together. The text provides detailed information for troubleshooting design issues and an understanding of passive, semi-passive, and active tags, so an informed choice of technology type can be made. It describes the unique identification (UID) standards necessary for military contractors and how to use RFID and AIT to meet those requirements. This book is unique in the depth of material presented, making it appropriate for engineers, students, and operational personnel as a resource for foundational concepts for integrating logistics and RFID. A comprehensive reference, this volume can be an academic text, a practitioner's handbook, and a military contractor's UID guide for using RFID and AIT technologies.

Wild Bill Elliott was a major western star. His screen persona met evil head-on and emerged victorious, bringing cheers from

Saturday audiences. This book covers Elliott's entire career. It begins with a biographical sketch and then discusses each of his 78 starring roles as well as his more than 130 supporting roles. The film entries include studio, release date, alternate titles, cast and credit listings, songs, location filming, color, running time, source, story synopsis, notes and commentary, quotations from published reviews and a critical summation of the film.

Appendices include Elliott's short films, TV and radio appearances and comic books.

The Big Book of Sherlock Holmes Stories Pantheon

A comprehensive, four-volume title, this almanac traces all of American military history from the European voyages of discovery through 2011, chronicling the pivotal moments that have shaped the United States into the country it is today. In addition to documenting key events, this title presents biographies of more than 250 key individuals and provides information on more than 250 historically significant technologies and weapons systems.

This book contains copies of all Dr. Gatling's original Gatling Gun patent and patent drawings from the United States Patent Office. Also included are the patent drawings of the Broadwell Drum Feed, Bruce feed and Accles feed that was used on Colt Gatling Guns. Shortly after the outbreak of the American Civil War, Dr. Richard J. Gatling began work on his most famous invention. A prototype gun was made late in 1861 and was demonstrated in Indianapolis early in 1862. On November 4, 1862, Dr. Gatling received the first of his 10 patents for the famous gun that etched his name into history forever. The Gatling Gun was sometimes called by Dr. Gatling, Colt Firearms Company and the United States Patent Office as a battery gun, rotating battery gun, rotating cannon and machine gun. When the "modern" machine gun was made, it was referred to as an automated machine gun. These patent drawings provide a step back in time to view a technically advanced 19th century weapon that changed history.

"The Indian Territory, 1879--Two men are on a collision course. Bass Reeves, who wears a deputy marshal's star, has sworn to uphold the law. The other is Marion Michael Donovan, a ruthless killer who murdered his first man at age fourteen. In the Indian Territories to investigate a group of white men selling guns to the Indians, Reeves enlists the help of an Indian deputy, Walks as Bear. Donovan has taken over the town of Temptation and, using a stolen Gatling gun, plans to rob a train carrying a shipment of gold. After discovering that Donovan is responsible for the murder of some Texas Rangers, Reeves finds himself in a race against time to stop the killers and prevent another massacre"--*Catalogue of the Public Documents of the ... Annual Report of the Secretary of War Rowman & Littlefield

This is the definitive guide book for building the RotaryMek-10X rubber band machine gun, one of the world's most advanced rubber band gun designs! To see a video demonstration of the gun and a preview of the book, look on the web for a video of the same title. Building the RotaryMek-10X is a complex, time-consuming woodworking project. Although successful completion of this project does not require particularly sophisticated woodworking techniques, the builder will need to have access to and be able to skillfully use a number of different tools, including a drill press, band saw, and computer-based scanner and printer. The end result of this project is a rubber band gun unlike any other, a truly fully automatic, rapid-firing, rubber band machine gun! In a manner analogous to a real machine gun, the mechanism of the RotaryMek-10X is driven by energy derived from the same source as that which propels the projectiles--the elastic potential energy of the stretched rubber band ammunition loaded onto the gun. There's no crank, no motor... just a trigger and a can of whoop-ass! If properly constructed from high-quality materials, the RotaryMek-10X can be loaded with as many as seventy size 33 rubber bands at one time. The gun develops an extremely high rate of fire (think of a Minigun), but it also has a responsive trigger system, allowing an operator to choose between firing many short bursts or just letting rip, "fire-hose-style." Please note that this project calls for the use of US-standard dimensional lumber as well as two different sizes of US-standard PVC plumbing pipe. Prospective builders outside the United States might first want to check the availability of the needed materials before committing to the project.

More than 130 years after its introduction, the Gatling is a force to be reckoned with. After being declared obsolete in 1911, it staged an impressive comeback as the Vulcan in the 1950s, terrified the Vietcong in the jungles of Vietnam and contributed to the swift defeat of Iraqi troops in the liberation of Kuwait. It will no doubt play a vital military role well into the 21st century, and this is the definitive book on its history, development and technology.
