Operation Desert Storm CreateSpace

Army technique publication (ATP) 3-21.91 / FM 3-21.91, "Stryker Brigade Combat Team Weapons Troop," describes how the Stryker brigade combat team (SBCT) weapons troop and its platoons fight. This publication provides doctrine for employing the SBCT weapons troop and its platoons. It contains guidance on techniques weapons troops and its platoons use in offensive, defensive, and stability tasks. The target audience includes leaders in the SBCT weapons troop, SBCT battalion and brigade level commanders, and staff officers.

CTC Trends Echo Point Books & Media

During warfighter exercises, it had become apparent that division and corps commanders were challenged with mission command of forces in their support areas. The commander of United States Army Forces Command directed commanders to establish a support area command post (SACP) to improve mission command. The Army's new Field Manual (FM) 3-0, Operations (06 OCT 2017), incorporates this guidance by modifying the geographical organization of an area of operations. FM 3-0 scales down the size of the support area and adds a consolidation area. The consolidation area will be assigned to a maneuver brigade or division. This enables the maneuver enhancement brigade (MEB) to perform its traditional mission and focus efforts on operations in the support area. FM 3-0 formalizes the requirement for

divisions and corps to establish a SACP (its doctrinal name, which is used throughout this handbook) to assist in controlling operations in the support and consolidation areas.

The Army Lawyer Lulu.com

This Army tactics, techniques, and procedures (ATTP) manual provides doctrinal guidance and procedures that will enhance the delivery of human resources (HR) support in brigade and battalion S-1 sections. It will help HR leaders to guide actions and provide procedures to enable decision making. This publication is nested with Field Manual (FM) 1-0, Human Resources Support, and provides overarching doctrinal guidance and direction for conducting S-1 operations. ATTP 1-0.1 promotes a common understanding of HR support fundamentals at battalion, brigade, or brigade equivalent level S-1 sections throughout the Army Force Generation (ARFORGEN) cycle. This manual, along with FM 1-0, provides sufficient information to allow for execution of all required HR missions and functions dictated by current operational requirements and anticipated future actions. ATTP 1-0.1 provides the doctrinal base for developing operations plans (OPLANs) and associated standing operating procedures (SOPs). Leaders and HR operators at all levels must apply these fundamentals using the military decision-making process (MDMP); troop leading procedures; and mission, enemy, terrain and weather, troops and support available, time available, civil considerations (METT-TC). This publication is an authoritative guide that requires judgment in application. ATTP 1-0.1 was previously published as Field Manual Interim 1-0.1 to address the Army's HR transformation concept and the transition to Personnel Services Delivery Redesign (PSDR), which transferred and

consolidated HR functions at brigade and battalion-level. This transition supported Army transformation from large, powerful fixed organizations, typically a division, to a brigade-centric design based on smaller, more self-contained organizations. Likewise, the S-1 structure was enhanced to support S-1 operations throughout all force pools of ARFORGEN, and S-1s now have the capabilities and resources to plan, coordinate, and execute all HR support core competencies and their subordinate key functions and tasks. HR transformation will impact S-1 sections as strategic objectives, structures, and processes change. These changes include—Reshaping HR processes and business practices; Using technology to apply a relevant, reliable, and achievable multi-component HR system; Realigning Army HR structures to meet needs and capabilities; Revising doctrine and training to integrate best practices and lessons learned; Delivering and executing HR service functions as close to Soldiers as possible; Continuing to build on the ability to provide support from home station. While the focus of this manual is on S-1 sections assigned to modified table of organization and equipment (MTOE) units, it also applies to tables of distribution and allowances (TDA) organizations and the support agencies (Installation Management Command [IMCOM]). IMCOM HR support to MTOE units in garrison is limited. Regardless of the type of organization or whether the unit is deployed or not deployed, providing effective and efficient HR support relies on trained HR professionals at all levels that can coordinate necessary HR support when needed.

Commander's Legal Handbook DIANE Publishing

This report describes innovative approaches for conducting

training using emerging simulation technology. It is intended as a forward looking reference for training developers and trainers interested in conducting specific types of training exercises within a Distributed Interactive Simulation (DIS) environment. The report characterizes major trends in training requirements within the Army community, presents five innovative training concepts that can be structured within a DIS environment for delivery of five types of training exercises, and describes the implementation and tryout of one of these five concepts, an Information Management Exercise (IMEX). Innovative training concepts, Information management exercises, Distributed interactive simulation, Simulation-Based Training, Automated command, Control and communication, Training tools.

Experienced commanders discuss anecdotes and case studies from their past operations.

Field Artillery Createspace Independent Publishing Platform Field Manual (FM) 6-02, Signal Support to Operations, is the premier Signal doctrine publication, and only field manual. FM 6-02 compiles Signal Corps doctrine into three chapters with supporting appendices that address network operations in support of mission command and unified land operations and the specific tactics and procedures associated with organic and nonorganic Signal forces. The fundamental idea of Signal Corps tactics is the employment and ordered arrangement of Signal forces in a supporting role to provide LandWarNet across the

range of military operations. The detailed techniques regarding the ways and methods to accomplish the missions, functions or tasks of the Signal Corps indicated in this FM will be addressed in supporting Army techniques publications (ATPs). Army forces operate worldwide and require a secure and reliable communications capability that rapidly adapts to changing demands.

S-1 Operations CreateSpace

This publication disseminates information on the mission, functions, structure, and concept of employment of HSS units.

On Feb. 7, 1991, during Operation Desert Storm, a Bradley and an M113 were destroyed by 2 Hellfire missiles fired from an Apache helicopter. Two U.S. soldiers were killed, and 6 others were wounded in the incident. This report provides a detailed discussion of the incident, including related events and factors that contributed to it, and an analysis of the U.S. Army's investigation of the incident. It addresses: whether equipment failure caused the incident, the Apaches' performance, and whether the name of the Apache gunner was improperly released to the press.

ADP 3-0, Operations, constitutes the Army's view of how to conduct prompt and sustained operations across multiple domains, and it sets the foundation for developing other principles, tactics, techniques, and procedures detailed in subordinate doctrine publications. It articulates the Army's operational doctrine for unified land operations. ADP 3-0 accounts for the uncertainty of operations and recognizes that a military

operation is a human undertaking. Additionally, this publication is the foundation for training and Army education system curricula related to unified land operations. The principal audience for ADP 3-0 is all members of the profession of arms. Commanders and staffs of Army headquarters serving as joint task force (JTF) or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations and joint or multinational forces. Trainers and educators throughout the Army will use this publication as well.

Training Circular (TC) 3-09.81, "Field Artillery Manual Cannon Gunnery," sets forth the doctrine pertaining to the employment of artillery fires. It explains all aspects of the manual cannon gunnery problem and presents a practical application of the science of ballistics. It includes step-by-step instructions for manually solving the gunnery problem which can be applied within the framework of decisive action or unified land operations. It is applicable to any Army personnel at the battalion or battery responsible to delivered field artillery fires. The principal audience for ATP 3-09.42 is all members of the Profession of Arms. This includes field artillery Soldiers and combined arms chain of command field and company grade officers, middle-grade and senior noncommissioned officers (NCO), and battalion and squadron command groups and staffs. This manual also provides guidance for division and corps leaders and staffs in training for and employment of the BCT in decisive action. This publication may also be used by other Army organizations to assist in their planning for support of battalions. This manual builds on the collective knowledge and experience

gained through recent operations, numerous exercises, and the deliberate process of informed reasoning. It is rooted in time-tested principles and fundamentals, while accommodating new technologies and diverse threats to national security.

Commander and Staff Guide to Liaison Functions CreateSpace

This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, *U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era*.

Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units is the 10th study in the Combat Studies Institute (CSI) Global War on Terrorism (GWOT) Occasional Paper series. This work is an outgrowth of concerns identified by the authors of *On Point: The United States Army in Operation IRAQI*

FREEDOM. Specifically, these authors called into question the use of long-range surveillance (LRS) assets by commanders during that campaign and suggested an assessment ought to be made about their continuing utility and means of employment. This revision contains some important additional information the author received after this book was originally published Major (Retired) James Gebhardt, of CSI, researched and wrote this Occasional Paper with that end in view. In this study, Gebhardt surveys the US Army's historical experience with LRRP and LRS units from the 1960s Cold War and Vietnam War, through their resurgence in the 1980s and use in Operations JUST CAUSE and DESERT STORM, to the advent of the GWOT. The paper's analytical framework examines each era of LRS units in terms of doctrine, organization, training, materiel, leadership, and personnel. In doing so, the author makes a strong case for continuing the LRS capability in the Army's force structure. The variety of environments and enemies likely to be faced by the military in the GWOT continues to demand the unique human intelligence abilities of trained and organized LRS units. As the Army leads the Armed Forces of the United States in combating terrorists where they live, the lessons found in this survey remain timely and relevant.

U.S. Army Field Manual 7-93 Long-Range Surveillance Unit Operations

This Handbook is designed to assist Army Commanders in taking proper immediate action when faced with a variety of legal issues that might arise during your command. The purpose of your actions should be to preserve the legal situation until you can consult with your servicing Judge Advocate. However, like most aspects of your command responsibilities, you can fail if you just wait for things to come to you. You need to be proactive in preventing problems before they occur. In the legal arena, this means establishing and enforcing high standards, ensuring your

Soldiers are fully aware of those standards and properly trained to comply with them. You must also properly train your Soldiers on all Army policies and higher level command standards so that they also understand and comply with them. Soldiers must also be well-versed in the Army Values and be able to apply those values to real- world situations, which will usually keep them well within legal bounds. Topics include: THE TOP TEN SITUATIONS WHERE YOU SHOULD IMMEDIATELY CONSULT YOUR SERVICING JUDGE ADVOCATE MILITARY JUSTICE/CRIMINAL LAW Introduction to Military Criminal Law Misconduct: Options and Duties Of The Commander Unlawful Command Influence R.C.M. 303 Preliminary Inquiry Non-Judicial Punishment, Article 15, UCMJ Article 15 Script Search and Seizure Self-Incrimination, Confessions, and Rights Warning UCMJ Punitive Articles Urinalysis, Drug and Alcohol Policies Fraternalization and Improper Senior-Subordinate Relationships Proper Responses to Reports of Sexual Assault Victim -Witness Issues INVESTIGATIONS Administrative Investigations/References Intro AR 15-6 Investigations Accident Investigations (AR 385-10) Line of Duty Investigations (AR 600-8-4) Fatal Training/Operational Accident Presentations to Next Of Kin (AR 600-34) Financial Liability Investigations (AR 735-5) STANDARDS OF ETHICAL CONDUCT Standards of Conduct Commanders Coins Support to Non-Federal Entities Government Motor Vehicle Transportation Family Readiness Groups Accompanying Spousal Travel Annual Filing of Financial Disclosure Forms ADMINISTRATIVE LAW AND PERSONNEL ACTIONS "Flagging" Soldiers from Positive Personnel Actions Enlisted Separations Officer Separations Bars To Reenlistment - Field Initiated Qualitative Service Program (QSP) Removal of

66 Stories of Battle Command

Liaison officer (LNO) functions are critical to the successful integration of diverse capabilities across military and civilian domains. Despite the importance of these functions, the Center for Army Lessons Learned (CALL) continues to capture observations which indicate significant issues concerning the selection, training, and employment of LNOs. In August 1998, the Air Land Sea Application (ALSA) Center published the Joint Task Force (JTF) Liaison Handbook, which provided planning and execution guidance to units providing and receiving LNOs at the JTF level. That handbook provided valuable planning and

execution guidance, but was written specifically for LNOs operating within a JTF. The ALSA Center handbook was retired in January 2003. LNO operations are discussed in several Army and Joint doctrinal publications, and are the subject of numerous

articles; however, there has been no single reference source commanders and staffs can use to select, train, and employ LNOs since the ALSA Center handbook.
