The increasing frequency and intensity of information aggression targeting the United States and its European allies demands more thorough consideration of concepts and practices for protecting against, resisting, and mitigating the effects of psychological manipulation and influence. Russia, in

particular, often appears to use messaging and intimidation as part of its efforts to influence multiple actors and countries, including the United States and its European allies. Unfortunately, however, concepts and practices for understanding and resisting the potential effects of efforts conducted by Russia and its agents are few. To address this, United

States European Command (USEUCOM) asked the RAND Corporation to identify strategies for defending against the effects of Russia's efforts to manipulate and inappropriately influence troops, government decisionmaking, and civilians. In this report, RAND researchers describe apparent efforts conducted by Russia and its agents involving the use of information to shape Russia's operating environment, focusing on the European context;

review and apply existing research on influence and manipulation to these efforts; and draw from existing practice to describe possible defensive approaches that USEUCOM and its various partners can consider using when defending against these actions. The framework they use offers a way to conceptualize the objectives, tactics, and tools of Russian information efforts in Europe.

Despite the Holocaust's profound impact on the history of Eastern Europe, the communist regimes successfully repressed public discourse about and memory of this tragedy. Since the collapse of communism in 1989, however, this has changed. Not only has a wealth of archival sources become available, but there have also been oral history projects and interviews recording the testimonies of eyewitnesses who experienced the Holocaust as children and

young adults. Recent political, social, and cultural developments have facilitated a more nuanced and complex understanding of the continuities and discontinuities in representations of the Holocaust. People are beginning to realize the significant role that memory of Holocaust plays in contemporary discussions of national identity in Eastern Europe. This volume of original essays explores the memory of the Holocaust and the Jewish past in

postcommunist Eastern Europe. Devoting space to every postcommunist country, the essays in *Bringing the Dark Past to Light* explore how the memory of the “dark pasts” of Eastern European nations is being recollected and reworked. In addition, it examines how this memory shapes the collective identities and the social identity of ethnic and national minorities. Memory of the Holocaust has practical implications regarding the current development of national cultures and

international relationships. [Rural Tourism in Europe](#)

Nearly fourteen million people died during the First World War. But why, and for what reason? Already many contemporaries saw the Great War as a "pointless carnage" (Pope Benedict XV, 1917). Was there a point, at least in the eyes of the political and military decision makers? How did they justify the losses, and why did they not try to end the war

earlier? In this volume twelve international specialists analyses and compares the hopes and expectations of the political and military leaders of the main belligerent countries and of their respective societies. It shows that the war aims adopted during the First World War were not, for the most part, the cause of the conflict, but a reaction to it, an attempt to give the tragedy a purpose - even if the consequence was to oblige the belligerents to go on fighting until

victory. The volume tries to explain why - and for what - the contemporaries thought that they had to fight the Great War. Sea-Level Rise and Coastal Subsidence: Causes, Consequences, and Strategies British Archaeological Reports Limited  
Global activity has broadly strengthened and is expected to improve further in 2014-15, according to the April 2014 WEO, with much of the impetus for growth coming from advanced economies. Although

downside risks have diminished overall, lower-than-expected inflation poses risks for advanced economies, there is increased financial volatility in emerging market economies, and increases in the cost of capital will likely dampen investment and weigh on growth. Advanced economy policymakers need to avoid a premature withdrawal of monetary accommodation. Emerging market economy policymakers must adopt measures to

changing fundamentals, facilitate external adjustment, further monetary policy tightening, and carry out structural reforms. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and concludes that global rates can be expected to rise in the medium term, but only moderately. Another chapter examines factors behind the fluctuations in emerging market economies' growth and concludes that strong

growth in China played a key role in buffering the effects of the global financial crisis in these economies.

Macedonia and the Jewish People Penguin

This book presents new research on the geomorphological impacts of extreme precipitation events. It focuses on the extreme summer floods, which affected Central and Eastern Europe in 2010. Case studies on their consequences, including inundations, urban flooding, soil erosion, river bank

retreat, alluvial fan accumulation, evolution of karst depressions, debris flows, landslides and soil saturation are presented for Poland, the Czech Republic, Ukraine, Slovakia, Hungary, Romania, Slovenia, Croatia, Serbia, Bulgaria and Macedonia. This key applied geomorphology book is crucial for anyone interested in these processes and their consequences and also for decision makers who face these catastrophes.

### Business Media

"This book, which is the result of more than 30 years of research, is a detailed history of Vardar Macedonian Jews until the Final Solution in Treblinka. Until now there has been a Hebrew edition published in 1986 and a Serbian one in 1990. This English version is an expanded one, much more comprehensive and enriched with material found in new documents and presented in a clear manner. Existing and available documents in sources in many

languages have been consulted, as can be seen in Bibliography at the end of the book. This is the first time there is an English-language version of the story of the Macedonian Jews. This book will be of interest not only to the descendants of Macedonian Jews who live in the United States and in other English-speaking countries who are looking for information on their ancestry, but will also be welcomed by a wider audience. Tide and Wreck is dedicated to the Jews of

ex-Yugoslavia, especially to those who lived in Macedonia for centuries until their tragic end in the Holocaust. The wounds have never healed, but this book is helping to repay at least some of the debt to their memory."--Publisher description.

Council of Europe  
Conference of Ministers  
Responsible for  
Spatial/Regional Planning  
(CEMAT). World Tourism  
 Organization Publications  
 This large volume  
 publishes the Proceedings  
 of the International

Workshop Identifying Changes held in Istanbul in 2002 and includes 25 papers which approach the Bronze to Iron Age transition primarily from an Anatolian perspective. Drawing on archaeological material from Anatolian sites, compared and contrasted with that of neighbouring areas such as Cyprus, Crete, Greece and the Pontic and Caucasus, the contributors assess the nature and chronology of 2nd millennium BC cultural change. The papers reflect the major

contribution that the natural sciences can make to this question, the need for more research into regional peculiarities and interactions, the need to track population movements and migrations, to investigate the pace of change and evidence for continuity from one artificially labelled period to another.

 Printed by J. Nichols for P. Almsly  
 Medicinal Plants, Volume 6 of the Genetic Resources, Chromosome Engineering, and Crop Improvement series

summarizes landmark research and describes medicinal plants as nature's pharmacy. Highlights Examines the use of molecular technology for maintaining authenticity and quality of plant-based products Details reports on individual medicinal plants including their history, origin, genetic resources, cytogenetics, and varietal improvement through conventional and modern methods, and their use in pharmaceutical, cosmeceutical, nutrition,

and food industries Explains how to protect plants with medicinal properties from deforestation, urbanization, overgrazing, pollution, overharvesting, and biopiracy Brings together information on germplasm resources of medicinal plants, their history, taxonomy and biogeography, ecology and biodiversity, genetics and breeding, exploitation, and utilization in the medicine and food industries Written by leading international experts and

an innovative panel of scientists, Medicinal Plants offers the most comprehensive and up-to-date information on medicinal plant genetic resources and their increasing importance in pharmaceutical and cosmeceutical industries, medicine, and nutrition around the world. Includes eight-page color insert more than 25 full color figures  
*A History of the Jews in Macedonia* Chaukhambha Publications  
With an expected growth rate of around 6 per cent

rural tourism is developing faster than the overall growth rate for international tourism arrivals. Due to its special importance for the European region, three seminars were held in Belgrade (Serbia), Kielce (Poland) and Yaremcha (Ukraine) to focus on three major issues: to contribute to a better understanding of rural tourism and to offer additional tools for planning and execution of initiatives; to enhance the importance of rural tourism in the agendas of

governments and international organizations; to generate political and financial support for the development of rural tourism. (WTO) *Complete Atlas of the World, 3rd Edition* Christian Faith Publishing, Inc. Catalogues of the minerals found in Tasmania have been kept since almost the earliest days of mining and have been of invaluable assistance to prospectors, mineral explorers, mineralogists and

collectors. This catalogue was first published by the Tasmania Department of Mines in 1910, and was extensively revised in 1969. Since then the improvements in technology and further investigations of minerals and mineral deposits have not only increased the number of identified species and data on mineral occurrences, but have also invalidated many previous 'species'. This catalogue extensively updates the previous catalogue. A total of 753 minerals are described,

comprising 483 confirmed species, 162 unconfirmed species, 72 variety or invalid names, and 36 series and group names. All entries in the 1969 catalogue have been re-evaluated and are now reclassified as to their known or likely validity. Species invalidated or doubted from the 1969 listing have been retained, with comments.

### **The Early and Middle Neolithic in Macedonia**

CRC Press

"Pain is a book of translated poetry on a massacre in Bosnia in

1941"--

Water for People, Water for Life British

Archaeological Reports Limited

The investigation on the history of the Yugoslav and Macedonian Jews between the two world wars was developed through a number of researches in the archives in Macedonia, Serbia, Greece and Israel. The project itself was based on three levels and approaches; from an international position of the Jews, after WWI; the regional, within the

history of the Yugoslav Jewry; and the position of the Sephardic Jewry on a local level, i.e. in Macedonia itself. The international context required a use of international acts brought in regard to minority rights protection, after the WWI during the Paris Conference and the establishment of the Geneva System. The second level observed the position of the Macedonian Sephards within the overall Yugoslav Jewry, which was consisted of Ashkenazim,

Sephardim as well as of the Orthodox Jews, as a separate group. The third level deals with the everyday life of the Macedonian Sephards from 1912 to 1941, as well as their social, cultural, political and economic development in one micro environment. The inter-ethnic relations, which were part of the political, social and Jewish reality in Macedonia, were also investigated in this study.

Complete Atlas of the World, 3rd Edition is now fully revised and updated to reflect the latest changes in world geography, including the

annexation of Crimea and the new nation of South Sudan. Bringing each featured landscape to life with detailed terrain models and color schemes and offering maps of unsurpassed quality, this atlas features four sections: a world overview, the main atlas, fact files on all the countries of the world, and an easy-to-reference index of all 100,000 place names. All maps enjoy a full double-page spread, with continents broken down into 330 carefully selected maps, including

100 city plans. You will also find a stimulating series of global thematic maps that explore Earth's place in the universe, its physical forms and processes, the living world, and the human condition. From Antarctica to Zambia, discover the Earth continent-by-continent with Complete Atlas of the World, 3rd

Edition.  
*Geomorphological impacts of extreme weather* Springer Science & Business Media  
This study attempts to resolve issues surrounding chronology and relations with the surrounding Balkan regions in the early and middle Neolithic of Macedonia. Its main

approach is a correlation between pottery from Macedonian Neolithic sites and those from neighbouring areas. The analysis locates the origins and diffusion of the Neolithic in Macedonia through four great phases of migration, and developments in pottery attributes are linked to these movements.
