Being an effective and well-rounded nurse in Australia is not just about technical skills - it's also about thinking like a nurse. The Road to Nursing helps students develop clinical reasoning and critical reflection skills, understand the philosophical and ethical considerations necessary to care for clients and reflect on how to provide care that meets the unique needs of clients. This edition retains three parts which guide students through their transition to university, formation of a professional identity and progression to professional practice. A revised chapter order improves the transition between topics and a new chapter explores the ever-changing Australian health landscape, including recent technological innovations. Each chapter includes definitions of key terms, reflection questions, perspectives from nurses, end-of-chapter review questions, research topics and resources that connect students with the real-world practice of nursing. Written by healthcare experts, The Road to Nursing is a fundamental resource for students beginning a nursing career.

Ordered to Care Cambridge University Press

Paediatric Nursing Skills for Australian Nurses is the first Australia-focused, dedicated paediatric skills text for undergraduate students. Integrating the theoretical and clinical components of nursing knowledge, the authors outline the clinical skills needed in the care of children and young people. The journey begins with an introduction to communication - an essential skill for any paediatric nurse - before exploring crucial topics such as mental health, nutrition and medication. These discussions are presented in connection with the latest national competency standards for registered nurses to help equip readers with these necessary abilities. Pedagogical features include case studies, clinical tips and reflection questions to encourage active thinking and analysis of key concepts. Each chapter concludes with a set of review questions, a research topic and a list of recommended readings to consolidate student understanding. Paediatric Nursing Skills for Australian Nurses is an essential resource for pre-registered nurses within the Australian paediatric setting.

Admission Assessment Exam Review E-Book Bailliere Tindall Limited

An engaging study of the dilemmas faced by American nursing, which examines the ideology, practice, and efforts at reform of both trained and untrained nurses in the years between 1850 and 1945. Ordered to Care provides an overall history of nursing's development and places that growth within the context of topical questions raised by women's history and the social history of health care. Building upon extensive use of primary and quantitative data, the author creates a collective portrait of nursing, from the work of the individual nurse to the political efforts of its organizations. Dr Reverby contends that nursing's contemporary difficulties are caused by its historical obligation to care in a society that refuses to value caring. She examines the historical consequences of this critical dilemma and concludes with a discussion of why nursing will have to move beyond its obligation to care, and what the implications of this change would be for all of us.

**Cambridge English for Human Resources Student's Book with Audio CDs (2)** Longman  
 Community nursing is the fastest growing area of nursing practice in Australia. This book offers an  
 engaging introduction to the theory, skills and application of community and primary health care.  
 Based on the 'Social Model of Health', *An Introduction to Community and Primary Health Care*  
 explores how social and environmental factors impact healthcare in Australian communities. It  
 discusses the principles of health and mental health promotion, the importance of cultural  
 competence and the practice of community needs assessment. The book is divided into three parts -  
 theory, skills and health professionals in practice. This latter section is unique to this book and  
 encourages students to consider how various nursing roles address issues of social justice, equality  
 and access. Readable and highly practical, *An Introduction to Community and Primary Health Care*  
 equips students with the theory, skills and understanding they will need as community and primary  
 healthcare professionals working across Australia.

The second edition of *Ethics and Law for Australian Nurses* is comprehensive in approach and allows  
 students to understand the relationship between the legal and ethical frameworks of nursing

practice. With an Australian focus, the book recognises the diversity of nursing practices and  
 practice settings while emphasising their uniform aim of supporting and promoting health and  
 wellbeing across the lifespan. Thoroughly revised to incorporate the latest methods and research,  
 this edition features updates to legislation and new chapters on end-of-life decisions and Indigenous  
 health care. It introduces readers to the 'Giving Voice to Values' approach to ethics and makes  
 extensive use of case studies, legal case extracts, practical examples and reflective questions to  
 illustrate key concepts throughout. *Ethics and Law for Australian Nurses* provides an innovative and  
 intuitive skills-based approach to nursing ethics and the legal context of nursing practice.

**OET Speaking For Nurses Book 1** Cambridge University Press

*Yatdjuligin: Aboriginal and Torres Strait Islander Nursing and Midwifery Care* introduces students to  
 the fundamentals of health care of Indigenous Australians, encompassing the perspectives of both  
 the client and the health practitioner. Written for all nurses and midwives, this book addresses the  
 relationship between Aboriginal and Torres Strait Islander cultures and mainstream health services  
 and introduces readers to practice and research in a variety of healthcare contexts. This new edition  
 has been fully updated to reflect current research and documentation, with an emphasis on cultural  
 safety. Three new chapters cover Torres Strait Islander health and wellbeing, social and emotional  
 wellbeing in mainstream mental health services and quantitative research. Chapter content is  
 complemented by case study scenarios, author reflections and reflection questions. These features  
 illustrate historical and contemporary challenges, encourage students to reflect on their own  
 attitudes and values, and provide strategies to deliver quality, person-centred health care.
