Integrated Coastal Zone  
Management Springer  
Study conducted at  
Jalpaiguri and Darjeeling  
districts of West Bengal,  
India.

Reports on Forest  
Administration in Burma  
Routledge  
The book is immensely

beneficial to the readers  
to have a clear  
understanding of various  
CBFM practices prevailing  
in Bangladesh. Providing a  
comprehensive and  
critical analysis of success  
stories concerning several  
CBFM practices in  
different forest areas of  
Bangladesh, together with  
their respective strengths  
and weaknesses, it  
identifies sharing

authority to take decision  
by the community as one  
of the main weaknesses.  
The other main weakness  
is the lack of beat level  
authority to coordinate  
with community for  
making the process  
vibrant. The book  
determines that it is the  
community patrol group  
which is most effective  
under the co-  
management system, yet

the general body and executive committee of the co-management system are composed of different stakeholders, each of which is subject to their own work pressures, and are not as effective as claimed. There is a need to empower communities living in and around forests, and to create ownership of the forests so that they can feel that the forests around them are by the community and for the community.

#### The Katyn Forest

Massacre Allied Publishers  
This book critically

explores the political ecology of human marginalization, wildlife conservation and the role of the state in politicizing conservation frameworks, drawing on examples from forests in India. The book specifically demonstrates the nuances within human-environmental linkages, by showing how environmental concerns are not only ecological in content but also political. In India a large part of the forests and their surrounding areas were inhabited far before they

were designated as protected areas and inviolate zones, with the local population reliant on forests for their survival and livelihoods. Thus, socioecological conflicts between the forest dependents and official state bodies have been widespread. This book uses a political ecology lens to explore the complex interplay between current norms of forest conservation and environmental subjectivities, illustrating contemporary articulation of forest rights and the

complex mediations between forest dependents and different state and non-state bodies in designing and implementing regulatory standards for wildlife and forest protection. It foregrounds the issues of identity, migration and cultural politics while discussing the politics of conservation. Through a political ecology approach, the book not only is human-centric but also makes significant use of the role of non-humans in foregrounding the conservation discourse,

with a particular focus on tigers. The book will be of great interest to students and academics studying forest conservation, human-wildlife interactions and political ecology.

Routledge

Coastal waters around the globe suffer from strain due to a widerange of human activities. The situation calls for a holisticapproach, combining expertise from nature and social science, toreach a balanced and sustainable development

of the coastal zone. This important book comprises the proceedings of TheInternational Symposium on Integrated Coastal Zone Management,which took place in Arendal, Norway between 11-14 June 2007. The main objective of the Symposium was to present currentknowledge and to address issues on advice and management related tothe coastal zone. The major themes of papers included in this bookare: Coastal habitats Impacts on coastal systems Integrated

Coastal Zone Management Coastal governance Comprising a huge wealth of information, this timely and well-edited volume is essential reading for all those involved in coastal zone management around the globe. All libraries in research establishments and universities where fisheries and aquatic sciences are studied and taught will need copies of this important volume on their shelves.

**The Indian Forester**  
Routledge

This discounted ebundle of the Three-Body Trilogy includes: The Three-Body Problem, The Dark Forest, Death's End "Wildly imaginative, really interesting." —President Barack Obama The Three-Body trilogy by New York Times bestseller Cixin Liu keeps you riveted with high-octane action, political intrigue, and unexpected twists in this saga of first contact with the extraterrestrial Trisolaris. The Three-Body Problem — An alien civilization on the brink of destruction captures the

signal and plans to invade Earth. Meanwhile, on Earth, different camps start forming, planning to either welcome the superior beings and help them take over a world seen as corrupt, or to fight against the invasion. The Dark Forest — In The Dark Forest, the aliens' human collaborators may have been defeated, but the presence of the sophons, the subatomic particles that allow Trisolaris instant access to all human information remains. Humanity responds with the

Wallfacer Project, a daring plan that grants four men enormous resources to design secret strategies, hidden through deceit and misdirection from Earth and Trisolaris alike. Three of the Wallfacers are influential statesmen and scientists, but the fourth is a total unknown. Luo Ji, an unambitious Chinese astronomer and sociologist, is baffled by his new status. All he knows is that he's the one Wallfacer that Trisolaris wants dead. Death's End — Half a century after the Doomsday Battle, Cheng

Xin, an aerospace engineer from the early 21st century, awakens from hibernation in this new age. She brings with her knowledge of a long-forgotten program dating from the beginning of the Trisolar Crisis, and her very presence may upset the delicate balance between two worlds. Will humanity reach for the stars or die in its cradle? Other Books by Cixin Liu (Translated to English) The Remembrance of Earth's Past The Three-Body Problem The Dark Forest Death's End Other

Progress Report of Forest Administration in Burma Univ of California Press Includes information by the Commission and various public officials and agencies on the economic, social, geographic and local governmental development of the Philippines. The Katyn Forest Massacre Tor Books

Originally published in 2004. In a radical breakaway from colonial and postcolonial policies that were based on centralized and revenue-orientated control of forests, the government of India announced the Joint Forest Management (JFM) policy resolution in 1990. JFM promised important managerial concessions, including share in cash profit from the timber harvest to forest citizens, in exchange for management of state-owned forests. The

government also asked the Forest Departments to invite village councils and NGOs to take part in the joint forest management schemes. Over a decade since its inception this volume examines the JFM, highlighting how state bureaucracy, local institutions and NGOs attempt to achieve the multiple goals of meeting subsistence needs, rural equity, sustainable forestry practices, and forest cover conservation. Investigating four institutions - village-based forest protection groups,

the Forest Department, village councils, and NGOs - across the States of Jharkhand and West Bengal, the book focuses on forest citizens and how they interact with other JFM institutions. In doing so, it challenges notions of assumed virtues of moral economy and romanticized views of gender and indigenous knowledge and practices. The monograph also raises issues of social capital (local history, politics and leadership), common property resource (CPR)

management and incentives for participation. While pointing out various inconsistencies that exist in the participatory forest framework, the book also shows the potential of JFM and suggests future directions forest management should take in India and elsewhere. *The Supreme Court Reports* John Wiley & Sons Contributed articles on the crisis of political refugees of Nepalese speaking people of Bhutan living in Nepal and the issue of Human rights

in Bhutan; published by Gangtok journal, a news weekly brought out as a special supplement on its 20th anniversary. **Dominion Law Reporter** Scientific Publishers Deals with the modern predicament of the Rabha (or Kocha) people, one of India;s indigenous peoples, traditionally practising shifting cultivation in the jungle tracts situated where the Himalayan mountains meet the plains of Bengal. When the area came under British rule and was converted into tea

gardens and reserved forests, Rabhas were forced to become labourers under the forest department. Today, large-scale illegal deforestation and the global interest in wildlife conservation once again jeopardize their survival. Karlsson describes the development of the Rabha people, their ways of coping with the colonial regime of scientific forestry and the depletion of the forest, as well as with present day concerns for wilderness and wildlife restoration and

preservation. Central points relate to the construction of identity as a form of subaltern resistance, the Rabha's ongoing conversion to Christianity and their ethnic mobilisation, and the agency involved in the construction of cultural or ethnic identities.

*The Political Economy of Forest Management*

This textbook is written for undergraduates & postgraduates, university & college teachers, scientists and professional foresters. It offers a real-life introduction to the

field of forestry and an interdisciplinary overview of the theory behind it. This textbook covers forestry in great depth and the real strength of the book lies in its focus on the context and applications of the field. Thanks to its wide scope, it not only serves as a useful introduction to the field but can also be used to understand how many other key forestry topics have changed in recent years as a consequence of the technology advancement. This textbook will significantly

help the students for preparation of UPSC-Civil Service Exam, UPSC-Indian Forest Service Exam, ICFRE & ICAR Scientists/NET Exam, University Entrance Exam for admission to M.Sc. and Ph.D. programmes.

**A Political Ecology of Forest Conservation in India**

Tropical forests are vanishing at an alarming rate. This book, based on extensive international field research, highlights one solution for preserving this precious resource: empowering

local people who depend on the forest for survival. Synthesizing a vast amount of information that has never been brought together in one place, Roger D. Stone and Claudia D'Andrea provide a clearly written and energizing tour of global efforts to empower community-based forest stewards. Along the way, they show the fundamental importance of tropical forest ecosystems and deepen our sense of urgency to save them for the benefit of billions of rural people

in tropical and subtropical regions as well as for countless species of plants and animals. In their travels to research this book, the authors saw many remarkable examples of how proficient even the poorest local people can be in stabilizing and recovering formerly destitute forests. With engagingly written case studies from Thailand's Golden Triangle to Mindanao in the Philippines, from Indonesia, India, and Africa to Brazil, Mexico,

and Central America, they introduce us to the communities and the individuals, the governments, the loggers, the agencies, and the local groups who vie for forest resources. Contrasting community-based efforts and traditional forest management with government and donor efforts, they discuss the many reasons why international institutions and national governments have been unable and unwilling to stem the accelerating loss of

tropical forestland. This book argues we are paying a terrible price--politically, economically, and environmentally--for allowing tropical forests to be stripped. Community-based forestry is no panacea, but this book clearly shows its effectiveness as a

management technique.
