Access to History for the IB Diploma: Authoritarian states Second Edition Hodder Education

The first systematic and comprehensive reader on Design History, this book examines the role of design and designed objects within social and cultural history. Extracts range from the 18th century, when design and manufacture separated, to the present day. Drawn from scholarly and polemical books, research articles, exhibition catalogues, and magazines, the extracts are placed in themed sections, with each section separately introduced and each concluded with an annotated guide to further reading. Covering both primary texts (such as the writings of designers and design reformers) and secondary texts (in the form of key works of design history), the reader provides an essential resource for understanding the history of design, the development of the discipline, and contemporary issues in design history and practice. Selected authors: Judy Attfield, Jeremy Aynsley, Rayner Banham, Roland Barthes, Jean Baudrillard, Walter Benjamin, Pierre Bourdieu, Christopher Breward, Denise Scott Brown, Ruth Schwarz Cowan, Clive Dilnot, Buckminster Fuller, Paul Greenhalgh, Dick Hebdige, Steven Heller, John Heskett, Pat Kirkham, Adolf Loos, Victor Margolin, Karl Marx, Jeffrey Meikle, William Morris, Gillian Naylor, Victor Papanek, Nikolaus Pevsner, John Ruskin, Adam Smith, Penny Sparke, John Styles, Nancy Troy, Thorstein Veblen, Robert Venturi, John Walker, Frank Lloyd Wright.

In a speech before Zurich's city council in 1553, Heinrich Bullinger declared that "the crown of England has entirely the teaching and faith that we also have." These words suggest a more direct and abiding relationship between the English and Zurich Reformations than has been recognized by previous historians. This book deepens our understanding of Swiss and English Protestantism, while simultaneously shedding light on the interactive practices of early modern cultural and intellectual communities and the history of the book. Three aspects of Zurich theology and practice attracted

English evangelicals to Zurich's tradition of Reformed Protestantism: rejection of the material aspects of Catholic piety, a strong anti-Anabaptist tradition, and stress on the unity of the religious and secular spheres under the authority of the civil magistrate. Dr Euler illustrates how English reformers adopted these ideas and applied them in England, allowing reformers like Bullinger to point to England as a potential ally and model of success for the Zurich tradition. Carrie Euler received her Ph. D. from Johns Hopkins University in 2004. She has published several articles on the Zurich and English Reformations in various volumes and journals, including the Sixteenth Century Journal. She is currently Assistant Professor of History at Central Michigan University.

Fidel Castro is one of the most interesting and controversial personalities of our time – he has become a myth and an icon. He was the first Cuban Caudillo – the man who freed his country from dependence on the USA and who led his people to rediscover their national identity and pride. Castro has outlived generations of American presidents and Soviet leaders. He has survived countless assassination attempts by the CIA, the Mafia, and Cubans living in exile. He has become one of the greatest politicians of the 20th Century. His biography, and the history of his country exemplify the tensions between East and West, North and South, rich and poor. As Castro's life draws to a close, the question as to what will become of Cuba is more important than ever. Will Castro open Cuba to economic reform and democratization, or stick to his old slogan socialism or death? In this remarkable, up-to-date reconstruction of Castro's life, Volker Skierka addresses these questions and provides an account of the economic, social, and political history of Cuba since Castro's childhood. He draws on a number of little-known sources, including material from the East German communist archives on Cuba, which were until recently inaccessible. This is an exciting, painstakingly researched, and authoritative account of the life of one of the most extraordinary political figures of our time.

Retraces the history of postmodern philosophy and proposes solutions to overcome its impasses. Philosophical realism has taken a number of different forms, each applied to different topics and set against different forms of idealism and subjectivism. Maurizio Ferraris's Manifesto of New Realism takes aim at postmodernism and hermeneutics, arguing against their emphasis on reality as constructed and interpreted. While acknowledging the value of these criticisms of traditional, dogmatic realism, Ferraris insists that the insights of postmodernism have reached a dead end. Calling for the discipline to turn its focus back to truth and the external world, Ferraris's manifesto—which sparked lively debate in Italy and beyond—offers a wiser realism with social and political relevance. Maurizio Ferraris is Full Professor of Philosophy and Director of the Laboratory for

Ontology at the University of Turin, Italy. His books include *Goodbye, Kant! What Still Stands of the Critique of Pure Reason*, also published by SUNY Press. Sarah De Sanctis is a PhD candidate in contemporary forms of realism in literature and philosophy at the London Graduate School and a translator for the Department of Philosophy at the University of Turin.

By the time he was killed in the jungles of Bolivia, where his body was displayed like a deposed Christ, Ernesto "Che" Guevara had become a synonym for revolution everywhere from Cuba to the barricades of Paris. This extraordinary biography peels aside the veil of the Guevara legend to reveal the charismatic, restless man behind it. Drawing on archival materials from three continents and on interviews with Guevara's family and associates, Castaneda follows Che from his childhood in the Argentine middle class through the years of pilgrimage that turned him into a committed revolutionary. He examines Guevara's complex relationship with Fidel Castro, and analyzes the flaws of character that compelled him to leave Cuba and expend his energies, and ultimately his life, in quixotic adventures in the Congo and Bolivia. A masterpiece of scholarship, *Companero* is the definitive portrait of a figure who continues to fascinate and inspire the world over.

"Amazing stories . . . Intimate portraits of how [these five ruthless leaders] were at home and at the table." —Lulu Garcia-Navarro, NPR's Weekend Edition Sunday Anthony Bourdain meets Kapuściński in this chilling look from within the kitchen at the appetites of five of the twentieth century's most infamous dictators, by the acclaimed author of *Dancing Bears*. What was Pol Pot eating while two million Cambodians were dying of hunger? Did Idi Amin really eat human flesh? And why was Fidel Castro obsessed with one particular cow? Traveling across four continents, from the ruins of Iraq to the savannahs of Kenya, Witold Szablowski tracked down the personal chefs of five dictators known for the oppression and massacre of their own citizens—Iraq's Saddam Hussein, Uganda's Idi Amin, Albania's Enver Hoxha, Cuba's Fidel Castro, and Cambodia's Pol Pot—and listened to their stories over sweet-and-sour soup, goat-meat pilaf, bottles of rum, and games of gin rummy. Dishy, deliciously readable, and dead serious, *How to Feed a Dictator* provides a knife's-edge view of life under tyranny.

The influence of materialist ontology largely dominates philosophical and scientific discussions. However, there is a resurgent interest in alternative ontologies from panpsychism (the view that at the base of reality exists potential minds, minds, or mind-lets) to idealism and dualism (the view that all of reality is material and mental). The Routledge Handbook of Idealism and Immaterialism is an outstanding reference source and the first major collection of its kind. Historically grounded and

constructively motivated, it covers the key topics in philosophy, science, and theology, providing students and scholars with a comprehensive introduction to idealism and immaterialism. Also addressed are post-materialism developments, with explicit attention to variations of idealism and immaterialism (the view that reality depends on a mind or a set of minds). Comprising 44 chapters written by an international and interdisciplinary team of contributors, the Handbook is organised into five clear parts: Idealism and the history of philosophy Important figures in idealism Systematic assessment of idealism Idealism and science Idealism, physicalism, panpsychism, and substance dualism Essential reading for students and researchers in metaphysics, philosophy of science, philosophy of religion, and philosophy of mind, The Routledge Handbook of Idealism and Immaterialism will also be of interest to those in related disciplines where idealist and immaterialist ontology impinge on history, science, and theology.

The Final Journey Princeton University Press

Contrary to common assumptions, medieval and early modern writers and poets often addressed the high value of freedom, whether we think of such fable authors as Marie de France or Ulrich Bonerius. Similarly, medieval history knows of numerous struggles by various peoples to maintain their own freedom or political independence. Nevertheless, as this study illustrates, throughout the pre-modern period, the loss of freedom could happen quite easily, affecting high and low (including kings and princes) and there are many literary texts and historical documents that address the problems of imprisonment and even enslavement (Georgius of Hungary, Johann Schiltberger, Hans Ulrich Krafft, etc.). Simultaneously, philosophers and theologians discussed intensively the fundamental question regarding free will (e.g., Augustine) and political freedom (e.g., John of Salisbury). Moreover, quite a large number of major pre-modern poets spent a long time in prison where they composed some of their major works (Boethius, Marco Polo, Charles d'Orléans, Thomas Malory, etc.). This book brings to light a vast range of relevant sources that confirm the existence of this fundamental and impactful discourse on freedom, imprisonment, and enslavement.

How to Feed a Dictator Farrar, Straus and Giroux (BYR)

David Piper has always been an outsider. His parents think he's gay. The school bully thinks he's a freak. Only his two best friends know the real truth: David wants to be a girl. On the first day at his new school Leo Denton has one goal: to be invisible. Attracting the attention of the most beautiful girl in his class is definitely not part of that plan. When Leo stands up for David in a fight, an unlikely friendship forms. But things are about to get messy. Because at Eden Park School secrets have a funny habit of not staying secret for long, and soon everyone knows that Leo used to be a girl. As David prepares to come out to his family and transition into life as a girl and Leo wrestles with figuring out how to deal with people who try to define him through his history, they find in each other the friendship and support they need to navigate life as transgender teens as well as the courage to decide for themselves what normal really means.

Since the onset of the pandemic, progressive opinion has been clear that hard lockdowns are the best way to preserve life, while only irresponsible and destructive conservatives like Trump and Bolsonaro oppose them. But why should liberals favor lockdowns, when all the social science research shows that those who suffer most are the economically disadvantaged, without access to good internet or jobs that can be done remotely; that the young will pay the price of the pandemic in future taxes, job prospects, and erosion of public services, when they are already disadvantaged in comparison in terms of pension prospects, paying university fees, and state benefits; and that Covid's impact on the Global South is catastrophic, with the UN predicting potentially tens of millions of deaths from hunger and declaring that decades of work in health and education is being reversed. Toby Green analyses the contradictions emerging through this response as part of a broader crisis in

Western thought, where conservative thought is also riven by contradictions, with lockdown policies creating just the sort of big state that it abhors. These contradictions mirror underlying irreconcilable beliefs in society that are now bursting into the open, with devastating consequences for the global poor.

Unlike many biographies, his own autobiography and other books, this story navigates the uncharted territory of the early childhood influences, tragedies, and traumas that helped shape the personality and formative psychological development of one of the 20th Centuries iconic political figures. Using first hand accounts, multiple sources, and a diverse range of perspectives this book draws a much more complex and deeper picture than the superficial, stereotypical portrayals of Fidel Castro as a Marxist revolutionary. The book takes you into the hidden recesses of his mind, motivations and the impact significant people had on shaping his political perspective. In particular the impact growing up with the stigma of illegitimacy, complex family dynamics, and a father with a temper who ruled the household with an iron fist.
