The Sorceress Saga:  
Book 5 The most vital  
time this world has  
known is here at last.  
Welcome to the  
Northern Mountains,  
the coldest place in the  
world. It is covered in

snow and ice that  
magic cannot  
completely hold back.  
Positively the dreariest  
place on the planet.  
The fact that anyone  
lives here is  
unbelievable, yet sky  
elves, dwarves, and  
brownies roam the  
land. This is also where  
Aria shall have her sky  
lessons and spend the  
remainder of her year.  
After this, our  
adventurous half-elf  
will have full reign as

Mother Elf at last... or maybe not with the way things are spiraling out of control, and far more than she is accustomed. It really is one disaster after another with Aria, and unfortunately many get entangled in them. But, of course, there is nothing Aria wouldn't do for her family, even if it meant defying gods. Even if it meant lying or selling her soul. Crossing into the cold confines of time, a realm within the stars, isn't too far off her list, either. Can she restrain her emotions as she does so, though? Keep herself from retreating back into old ways? Come join Aria on her last journey to her future, and on the way interact with the northern dwarves, the sky elves, a few brownies, and an array

of council members from all over the fae world. The ending will be most definitely an unexpected surprise.

 This book studies

formal semantics in modern type theories (MTTsemantics). Compared with simple type theory, MTTs have much richer type structures and provide powerful means for adequate semantic constructions. This offers a serious alternative to the traditional settheoretical foundation for linguistic semantics and opens up a new avenue for developing formal semantics that is both model-theoretic and proof-theoretic, which was not available before the development of MTTsemantics. This book provides a reader-friendly and precise description of MTTs and offers a comprehensive introduction to MTT-semantics. It develops

several case studies, such as adjectival modification and copredication, to exemplify the attractiveness of using MTTs for the study of linguistic meaning. It also examines existing proof assistant technology based on MTT-semantics for the verification of semantic constructions and reasoning in natural language. Several advanced topics are also briefly studied, including dependent event types, an application of dependent typing to event semantics.

When Superman debuted in 1938, he ushered in a string of imitators--Batman, Wonder Woman, Captain Marvel, Captain America. But

what about the many less well-known heroes who lined up to fight crooks, super villains or Hitler--like the Shield, the Black Terror, Crimebuster, Cat-Man, Dynamic Man, the Blue Beetle, the Black Cat and even Frankenstein? These and other four-color fighters crowded the newsstands from the late 1930s through the early 1950s. Most have since been overlooked, and not necessarily because they were victims of poor publication. This book gives the other superheroes of the Golden Age of comics their due.

Furthermore, the class I took was the most useless one in the entire academy. It's not suitable for me to play the pig to eat the tiger. I can only slap my face to make it look fat. Everything is as I remember it ... □

WEBNOVEL

On May 1, 1960, a U-2 was shot down over Russia and its pilot, Gary Powers, was captured, followed by Premier Khrushchev using the long-awaited summit meeting in Paris as a public platform to denounce U.S. intrusion on Russian air space and to demand an apology from President Eisenhower. All these events made U-2 a world-renowned spyplane. This extraordinary high altitude reconnaissance aircraft had also been used over China and her vicinity. A US-ROC joint

entity (Black Cat Squadron) was organized to conduct the operation from Taiwan for fifteen years. Five U-2s were shot down by Communist surface-to-air missiles. Two of the Nationalist Chinese pilots survived the missile explosion, yet were severely wounded, and then captured by the People's Republic of (PRC). They were incarcerated and harassed for almost nineteen years. They lived through the notorious Cultural Revolution. Their loving families in Taiwan were ruined. By the time these two miserable pilots were permitted to leave the PRC, their loyalty was questioned strongly by their own government in >Taiwan. Then they

were entangled in the psychological warfare between the rivalries across the Taiwan Strait. Finally they were allowed to return to Taiwan than a quarter century later.

*One Black Cat* Wildside Press LLC  
 Rocky Fitzgerald is embroiled in another

murder investigation and this time it's totally not her fault. Well. Mostly not her fault. Ish. Yes, she did spontaneously adopt two kittens, and yes, their original foster mom was coincidentally murdered the next day, but Rocky doesn't plan to get involved. Why would she? She's got her life coaching clients, and her Insta-fame to maintain, and oh yeah, also her not-romance with her oldest friend-slash-frenemy (actual detective) Nichelle Crawford. Rocky's too busy for murder. That's what she tells herself right up until her grandfatherly demon pal enlists her help clearing the name of one of his proteges, whom he insists could not have done this

murder. Demons don't lose their tempers and stab people! It's preposterous. Unfortunately for Rocky, that argument doesn't hold up so well with Nichelle or any of the Fitzgerald cops. She's gotta figure out who really committed this murder, and she should probably do that before the family Thanksgiving party goes to hell over it. Kittens are a bigger job than she ever bargained for, her cousin is acting weirdly suspicious all of a sudden, and Nichelle has no sympathy at all for an amateur sleuth trying to get a demon out of hot water. Rocky's life has never been simple, but this is way too much. And just when she thinks everything's worked out, a surprise arrest

throws the family for a loop. Thanksgiving may never be the same.

The Black Cat Marvel Collects Black Cat (2019) #11-12, Black Cat Annual (2019) #1, Free Comic Book Day 2020 (Spider-Man/Venom) #1 (Spider-Man story). The Black Cat's Marvel Universe crime spree continues! And her next target is Stark Unlimited! But stealing a suit of Iron Man armor is bold, even for a master thief like Felicia Hardy. And now she's on the run (on the fly, really) from Shellhead through the concrete canyons of Manhattan! But Felicia is also still on the run from the Thieves Guild — and it's possible that the armor wasn't really what she was stealing! Plus: You are cordially

invited to the wedding of Black Cat...and Spider-Man?! Is this the comics event of the year, or is something else going on? Even if Spidey and the Cat are a happy couple, they won't be for long — because the Vulture is preparing to strike!

### **Undoing the Digital**

Wildside Press LLC  
Undoing the Digital challenges common ways of understanding digital technology and its relationships to literacy and literacy education. The book explores how a sociomaterial perspective can provide an alternative analysis of literacy in the context of digital communication.

Introducing a series of conceptual tools and examples, the book examines digital communication as an emergent interweaving of social, material and semiotic resources. The perspective invites literacy research to

focus more on the relations associated with the process of making meaning: the new collaborations, stories, conceptualisations, directions, and intentions that take shape in, and also help to shape, the contemporary mediascape. Drawing on studies conducted in a variety of contexts, this book is key reading for all advanced students and researchers of literacy and digital media within Education, Applied Linguistics and Media/Communication Studies.
