## PHILLIPS ZAVIER

### Pharmacology Clear & Simple

University of Chicago Press  
 Jacob Riis (1849-1914) was the author of *How the Other Half Lives* (1890). This study of his life and work includes excerpts from Riis's diary, chronicling romance, poverty, temptation, and, after many false starts, employment as a writer and reformer. In the second half, Yochelson describes how Riis used photography to shock and influence his readers. The authors describe Riis's intellectual education and discuss the influence of *How the Other Half Lives* on urban history. It shows that Riis argued for charity rather than social justice; but the

fact that he understood what it was to be homeless did humanize Riis's work, and that work has continued to inspire reformers. Yochelson focuses on how Riis came to obtain his now famous images, how they were manipulated for publication, and their influence on the young field of photography.

 The miracle stories surrounding Sainte Foy form one of the most complete sets of material relating to a medieval saint's cult

and its practices. Pamela Sheingorn's superb translation from the Medieval Latin texts now makes this literature available in English. *The Book of Sainte Foy* recounts the virgin saint's martyrdom in the third century (*Passio*), the theft of her relics in the late ninth century by the monks of the monastery at Conques (*Translatio*), and her diverse miracles (*Liber miraculorum*); also included is a rendering of the Provençal *Chanson de Sainte Foy*, translated by Robert L. A. Clark. The miracles distinguish Sainte Foy as an unusual and highly individualistic child saint displaying a fondness for gold and pretty things, as well as a penchant for playing practical jokes on her worshippers. In his record of Sainte Foy, Bernard of Angers, the eleventh-century author of the first parts of the *Liber miraculorum*, emphasized the saint's

"unheard of" miracles, such as replacing missing body parts and bringing dead animals back to life. The introduction to the volume situates Sainte Foy in the history in the history of hagiography and places the saint and her monastery in the social context of the high Middle Ages. Sheingorn also evokes the rugged landscape of south central France, the picturesque village of Conques on the pilgrimage road, and, most important, the golden, jewel-encrusted reliquary statue that medieval believers saw as the embodiment of Sainte Foy's miracle-working power. In no other book will readers enjoy such a comprehensive portrait of Sainte Foy and the culture that nurtured her.

*Informator dla kandydatów na studia wyższe w roku akademickim ...* BRILL

Since antiquity, the she-wolf has served as the potent symbol of Rome. For more than two thousand years, the legendary animal that rescued Romulus and Remus has been the subject of historical and political accounts, literary treatments in poetry and prose, and visual representations in every medium. In *She-Wolf: The Story of a Roman Icon*, Cristina Mazzone examines the evolution of the she-wolf as a symbol in western history, art, and literature, from antiquity to contemporary times. Used, for example, as an icon of Roman imperial power, papal authority, and the distance between the present and the past, the she-wolf has also served as an allegory for greed, good politics, excessive female sexuality, and, most recently, modern, multi-cultural Rome. Mazzone engagingly analyzes the various role guises of the she-wolf over time in the first comprehensive study in any language on this subject.

**The Book of Sainte Foy** MIT Press

An integrated, global view of macroeconomics, showing the connections between goods markets, financial markets, and labour markets worldwide. This is a book rooted in the real-world: from the major economic crisis of the late 2000s to the profound economic effects caused by the COVID-19 pandemic, from monetary policy in the US, to Brexit, the problems of the Euro area and growth in China, it will help your students make sense not only of current macroeconomic events but also those that may unfold in the future.

*Nouvelles statistiques de l'Office centrale de statistique* Wydawnictwo Naukowe

Uniwersytetu Mikołaja Kopernika

The main purpose of *Lectures on Macroeconomics* is to characterize and explain fluctuations in output, unemployment and movement in prices.

*Lectures on Macroeconomics* provides the first comprehensive description and evaluation of macroeconomic theory in many years. While the authors' perspective is broad, they clearly state their assessment of what is important and what is not as they present the essence of macroeconomic theory today. The main purpose of *Lectures on Macroeconomics* is to characterize and explain fluctuations in output, unemployment and movement in prices. The most important fact of modern economic history is persistent long term growth, but as the book makes clear, this growth is far from steady. The authors analyze and explore these fluctuations. Topics include consumption and investment; the Overlapping Generations Model; money; multiple equilibria, bubbles, and stability; the role of nominal rigidities; competitive equilibrium business cycles, nominal rigidities and economic fluctuations, goods, labor and credit markets; and monetary and fiscal policy issues. Each of chapters 2 through 9 discusses models appropriate to the topic. Chapter 10 then draws on the previous chapters, asks which models are the workhorses of macroeconomics, and sets the models out in convenient form. A concluding chapter analyzes the goals of economic policy, monetary policy, fiscal policy, and dynamic inconsistency. Written as a text for graduate students with some background in macroeconomics, statistics, and econometrics, *Lectures on Macroeconomics* also presents topics in a self contained way that makes it a suitable reference for professional economists.

[Sustainable Logistics and Production in Industry 4.0](#) Routledge

This print textbook is available for students to rent for their classes. The Pearson print rental program provides students with affordable access to learning materials, so they come to class ready to succeed. For intermediate courses in economics. A unified view of the latest macroeconomic events In *Macroeconomics*, Blanchard presents an integrated, global view of macroeconomics, enabling students to see the connections between goods markets, financial markets, and labor markets worldwide. Organized into two parts, the text contains a core section that focuses on short-, medium-, and long-run markets and two major extensions that offer more in-depth coverage of the issues at hand. From the major economic crisis that engulfed the world in the late 2000s, to monetary policy in the US, to the problems of the Euro area, and growth in China, the text helps students make sense not only of current macroeconomic events but also of

those that may unfold in the future. Integrated, detailed boxes in the 8th Edition have been updated to convey the life of macroeconomics today, reinforce lessons from the models, and help students employ and develop their analytical and evaluative skills. Also available with MyLab Economics By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student.

*Economics* OUP Oxford

"Understanding the latest trends and technologies and their impact on enterprises, organizations or state administrations is essential to successfully develop a business in the age of Industry 4.0. This book presents a unique selection of topics and offers the reader an understanding of the implications of the newest technologies such as Artificial Intelligence (AI), Internet of Things (IoT), Augmented Reality (AR) and new trends like social media and sustainable competitiveness in business. It presents the impact of the newest trends on businesses, consumers, and the result on the economy. Contributions showcase the technical perspective of new technologies and provides an innovative and enriching perspective on the implementation of AI in e-commerce and the developmental barriers it can create, modern social media usage in enterprises, the newest trends in innovation management, sustainable competitiveness in the business context, the influence and effect of augmented reality, and the privacy problem of Internet of Things to consumers. This book illustrates how to develop innovation cooperation between business, academia and public institutions through the example of biopharmaceutical industry. It will be of value to researchers, academics, professionals, and students in the fields of economics, management, international business"--

**Jewish Book Art Between Islam and Christianity** Cambridge University Press

This book discusses the decoration types of Sephardic illuminated Bibles in their broader historical, and social context in an era of cultural transition in Iberia and culture struggle within Spanish Jewry.

#### **Nukuoro** Yale University Press

Given the three pillars of sustainability, besides the environment, the interplay of social and economic dimensions provides valuable insight into how society is molded and the key components that should be considered. In terms of social sustainability, processes and framework objectives promote the wellbeing that is integral to the balance of people, planet, and profit. Economic practices consider the system of production, resource allocation, and distribution of goods and services with respect to demand and supply between economic agents. As a result, an economic system is a variant of the social system in which it exists. At present, the forefront of social sustainability research partially encompasses the impact of economic practices on people and society, with notable emphasis centered on the urban environment. Specific interdisciplinary analyses within the scope of sustainability, social development, competitiveness, and motivational management, as well as decision making within the urban

landscape, are considered. This book contains nine thoroughly refereed contributions that interconnect detailed research into the two pillars reviewed.

Nukuoro Atoll is a ring of tiny islands in the south Pacific that has a total area of only 1.7 square kilometers and is home to only three hundred residents. Yet the tiny aitu sculptures produced there are known worldwide, appreciated for their unusual forms and coveted for their rarity. This book features images of almost half the aitu sculptures known to exist, starting with the earliest ones that were purchased by trader Johann Stanislaus Kubary in 1873. These pieces are distributed throughout museums across the globe, and they are rarely seen as a group—let alone photographed in such stunning detail. The resulting book offers an unprecedented chance to assess the form and the achievement of the sculptors of Nukuoro Atoll.

#### **Our Country** Distributed Art Pub Incorporated

The 1993 SNA represents a major advance in national accounting. While updating and clarifying the 1968 SNA, the 1993 SNA provides the basis for improving compilation of national accounts statistics, promoting integration of economic and related statistics, and enhancing analysis of economic developments. The 1993 SNA deals more clearly with relationships between economic flows (such as production, income, savings, accumulation, and financing) and links between these flows and stocks. At the same time the 1993 SNA reflects the many significant developments that have taken place in financial markets and completes the integration of balance sheets into the system. The 1993 SNA also suggests how satellite accounts (e.g. environmental accounts) and alternative classifications (e.g., through social accounting matrices) can be used to augment the central framework of the system.

#### **Rediscovering Jacob Riis** Hirmer Verlag

The book provides a comprehensive approach to the assessment of the nature of exporting activity, combining well-established theoretical reasoning with empirical evidence, and also signalling important economic policy recommendations. It is suitable for a wide range of recipients ranging from scholars and students to policy-makers or local/regional authorities engaged in the process of designing/implementing regional policies. Regional authorities show more interest in their export potential because globalisation makes the

regional economies more open and vulnerable to external economic shocks. The international trade channel has become an important factor influencing region's economic performance, including dynamics and volatility of economic growth as well as labour market performance. Due to economic transition and the accession to the European Union (EU), Poland's regions have become more open than ever. For regions of both Poland and Spain (an EU country similar to Poland in terms of size and the number of administrative units), being part of the EU's internal market with a free circulation of goods and capital - exerts competitive pressure that can be regarded a stress test showing the regional adaptive capacity and competitiveness. Regions differ in many aspects, including size, the structure of the economy, overall level of development, human as well as physical capital endowment, attractiveness to investors, transport infrastructure, proximity to foreign markets, etc. Foreign trade activity is another sphere, in which regional disparities can be observed, which so far has often been neglected. Traditionally, export activity has been analysed for countries, groups of countries or particular products. The regional dimension of exporting activity was rather neglected or not noticed. As more detailed and comprehensive data is becoming available for regions, one can see that exports are strongly diversified regionally. The literature on exports - as such - is an important part of research within economics. Research on regional aspects of exports is scarce.

#### **Macroeconomics** New York : McGraw-Hill

This paper investigates whether banking crises are associated with declines in bilateral exports. We first develop a simple open economy model in which banking crises translate into negative liquidity shocks, leading to collapses in exports through supply-side and demand-side shocks. We then estimate a gravity model using a sample of developed and developing countries over the period 1988-2010. The results suggest that crisis-hit countries experience lower levels of bilateral exports, particularly in developing countries where supply-side shocks are found to be relatively more important than demand shocks. In developing countries, exports of manufactured goods are disproportionately hurt by banking crises and this negative effect is stronger in industries relying more on external finance. These findings are robust to correcting for potential endogeneity, to changes in the sample, and to alternative estimation methods.

**Human Factors of a Global Society**

Prentice Hall

COVID-19 has hit the Polish society and its economy hard, even if to a lesser extent than other European countries.

Employment has declined and public debt has increased abruptly, which will make it more challenging to solve long-term issues, such as the low productivity of some workers, weak environmental outcomes and rising ageing costs.

Lectures on Macroeconomics University of Pennsylvania Press

Dada includes many of the key figures in the history of modernism, such as Hans Arp, Marcel Duchamp, Max Ernst, Hannah Hoch, John Heartfield, Francis Picabia, Kurt Schwitters, and Sophie Taeuber, and introduces artists who are less well known. This book explores the variety of art-making practices that emerged between 1916 and 1924 in the movement's primary centers: Zurich, Berlin, Hannover, Cologne, New York, and Paris. Six city essays by scholars of the movement; an illustrated chronology; more than forty artists' biographies; period photographs; and extensive plate sections document a provocative and influential artistic era. This illustrated book accompanies Dada, the most comprehensive museum exhibition of Dada art ever mounted in the United States, on view in 2006 at the

National Gallery of Art, Washington, and The Museum of Modern Art, New York. The exhibition was on view at the Musee national d'art moderne-Centre Pompidou in Paris in 2005.

Kultura konsumpcji - wartości, cele, dobrostan McGraw-Hill Education (UK) Discusses four illuminated haggadot, manuscripts created for use at home services on Passover, all created in the early twelfth century.
