Max Goes to the Space Station Piffikus

This educational tool gives a new meaning to "rocket science." Contrary to what was previously agreed, rocket science doesn't have to be too difficult. It can actually be presented in a way that's easy for young learners to understand. The secret? Pictures! With the right placement of images and selected texts, pictures can become the secret to effective study. Grab a copy today!

There's a Hole in my Galaxy Createspace Independent Publishing Platform

Experience the force of liftoff * Create your own constellations * Write a postcard from another planet * Make a club-soda comet, and more! From rocketing out of Earth's gravity and orbiting our planet to probing other planets and walking on the Moon, Cosmic Science makes exploring space a blast! More than 40 easy, safe--and fun--activities show how rockets work, why the shape of the Moon seems to change, just how much power the Sun has, what it's like to live and work in space, and much more!

Cosmic Science Sourcebooks Explore

Scholastic's bestselling OLD LADY becomes an astronaut in this adventure full of hilarious laughs and fun facts about space -- perfect for the 50th anniversary of the moon landing!

Max Goes to Jupiter Penguin

Readers will want to grab a telescope and explore the night skies

after finishing this overview of our solar system. Our solar system consists of eight planets, as well as numerous moons, comets, asteroids, and meteoroids. For thousands of years, humans believed that Earth was at the center of the Universe, but all of that changed in the 17th century. Astronomers like Nicolaus Copernicus, Galileo Galilei, Johannes Kepler, and Isaac Newton proposed the unthinkable theory that Earth and the other planets actually revolved around the Sun. This engaging book chronicles the beginning of the modern age of astronomy, then follows later discoveries, including NASA's current missions in space.

A Kid's Guide to Black Holes Astronomy Books Grade 6 |

Astronomy & Space Science Sourcebooks Jabberwocky
Swift Walker loved to walk fast. His sister warned him, "One day, you'll walk so fast you won't be able to stop!" His speedy legs took him to see all the oceans of the world, and now his "super powers" are taking him to a whole new level. Join Swift on an adventure to all the planets in our solar system. Swift Walker introduces kids to real facts about our solar system with a fun character they can relate to. Perfect for home, school, or homeschoolers. Ages 4 and up.

Science Tutor, Grades 6 - 8 Sourcebooks, Inc.

Is it true that Black Holes suck everything that comes near it? It's time to learn the truths and the myths behind these mysterious giants in outer space. It's interesting to know that even if our scientists only know a portion of the truth about Black Holes, it's still enough to give you a glimpse of the universe. Grab a copy now!

Baby University Abc's Board Book Set Evan-Moor Corporation
The perfect space and science activity book for kids ages 4-8!

Oodles of fun and beautiful coloring pages abound in this activity book. Kids won't even realize they are learning! Topics touched on include: atoms, magnets, planets, organisms, insects, dinosaurs, satellites, molecules, photosynthesis, DNA, amoebas, and MORE! Makes a great workbook for kids to keep them busy on road trips, waiting rooms, or to use as part of your comprehensive home school curriculum. Great Christmas gift for kids! Fonts are specifically chosen for correct letter formation for the handwriting / spelling practice all with a fun science theme and beautifully drawn pictures abounding throughout!

Think Like an Astronaut! How Do Rockets Work? - Science for Kids - Children's Astronomy & Space Books Paw Prints

Why should you buy this book for your child? Well, it contains carefully picked information and then presents that in a way that attracts a child. The inclusion of cool photos increase the efficiency of this book as a tool for learning. So what are you waiting for? Encourage your child to learn about the cosmos today!

Interactive Notebook: Earth & Space Science, Grades 5 - 8
Penguin

Encourage students to create their own learning portfolios with Interactive Notebook: Earth and Space Science for grades five through eight. This interactive notebook for science students includes 29 lessons in these four units of study: -geology - oceanography -meteorology -astronomy This personalized

resource helps students review and study for tests. Mark Twain Media Publishing Company specializes in providing engaging supplemental books and decorative resources to complement middle- and upper-grade classrooms. Designed by leading educators, this product line covers a range of subjects including mathematics, sciences, language arts, social studies, history, government, fine arts, and character.

Where Is Our Solar System? Courier Dover Publications

Journey from Earth to the outer reaches of the universe with this stunning book about space! You'll encounter bizarre planets, distant stars, and intricate galaxies. From planets and asteroids to black holes and galaxies, every page of this captivating book reveals the secrets behind more than 100 celestial objects. Get ready to explore fun facts and exciting new scientific discoveries! For centuries, the mysteries of space have captured our imaginations. This picture book will illuminate imaginations and spark curious minds to explore the vastness of space. Take your little astronaut on a journey from our planet out into the furthest reaches of the universe! Filled with gorgeous illustrations and incredible photography, young readers will be intrigued by the detailed close-up images of each celestial body. The engaging storybook-style descriptions and simple text shed a light on facts, myths, and key discoveries about the universe. Explore the wonders of our solar system and beyond. This educational book also includes reference pages packed with fascinating information. Journey Through the Vastness of Space Join us on an adventure across the universe, as we rocket to the stars! Discover 100 objects from the universe, arranged from the closest to our planet to the ones the furthest away. Storybook-

style text and out-of-this-world pictures make this book perfect for an astronomical bedtime. It's also a fantastic gift for children who can't get enough of space. Grab your spacesuit and put your helmet on! Inside the pages of this adventure book, you'll find: - Beautiful illustrations and incredible photography that showcase the mysteries of space. - Discover 100 remarkable objects in the cosmos. - Engaging storybook-style descriptions that explain key discoveries about the universe. More to Explore Once you've discovered *The Mysteries of the Universe*, dive into the companion titles from this series from DK Books! *The Wonders of Nature* explores more than 100 items from the natural world and *An Anthology of Intriguing Animals* showcases animals around the world.

What Is NASA? Roaring Brook Press

Fans of Chris Ferrie's *ABCs of Biology*, *ABCs of Space*, and *Quantum Physics for Babies* will love this introduction to aerospace engineering for babies and toddlers! Help your future genius become the smartest baby in the room! It only takes a small spark to ignite a child's mind. Written by an expert, *Rocket Science for Babies* is a colorfully simple introduction to aerospace engineering. Babies (and grownups!) will learn about the basics of how lift and thrust make things fly. With a tongue-in-cheek approach that adults will love, this installment of the Baby University board book series is the perfect way to introduce basic concepts to even the youngest scientists. After all, it's never too early to become a rocket scientist! If you're looking for engineer board books, infant science books, or more Baby University board books to surprise your little one, look no further! *Rocket Science for Babies* offers fun early learning for your little scientist!

Pluto HarperCollins Children's Books

Lesson plans and activities to help teach basic science to elementary school level students.

Super Cool Space Facts brings you out-of-this-world fun--and a must have title for anyone interested in space books for kids.

There's No Place Like Space National Geographic Books

Learn about the planet Pluto, the ninth planet from the sun. Using this book as your guide, you will learn to identify the characteristics and composition of Pluto that makes it unique. You will also get an idea on what it would be like if you were actually on this rock-and-ice planet. Read to learn beginning today. Secure a copy now.

Science Encyclopedia Scholastic Inc.

Set in the future, Max and his crew must take an incredible ride on a new device called the Space Elevator to help his friend Tori, the chief scientist of the Jupiter Mission, explore two of Jupiter's moons.

Rocket Science Speedy Publishing LLC

Life In Outer Space Bears and birds, people and planets -- many things live on planet Earth. But do they live anywhere else? For a long time people have wondered about that. Maybe you have, too. Read and find out how scientists search for signs of life in outer space.

There Was a Black Hole that Swallowed the Universe

Scholastic Inc.

Connect students in grades 6 and up with science using Science Tutor: Earth and Space. This effective 48-page resource provides additional concept reinforcement for students who struggle in earth and space science. Each lesson in this book contains an Absorb section to instruct and simplify concepts and an Apply section to help students grasp concepts on their own. The book covers topics such as the layers of the earth, types of rock, how rock is formed, weather, the phases of the moon, and Earth's place in the solar system. It also highlights key terms in the text and includes a recap of the metric system. The book supports National Science Education Standards.

The Mysteries of the Universe National Geographic Books

Introduces basic concepts about outer space, from the sun and the moon to the planets and space exploration.

The First Book of Airplanes Carson-Dellosa Publishing
