Continuing his major contribution to medieval Jewish intellectual history, Haym Soloveitchik focuses here on the radical German Pietists and their main literary work *Sefer Ḥasidim*, and on the writings and personality of the Provençal commentator Ravad of Posquières. In both areas he challenges reigning views and sets a new agenda for research.

This volume comprises selected papers of SEM IV & V (Studentag Englisches Mittelalter), held at Potsdam in 2002 & 2003, and provides a representative cross-section of topics in the field of English medieval studies in Germany and Switzerland. The spectrum ranges from

cultural studies centring around the history of ideas, questions of gender and the reception of the Middle Ages, to philological and linguistic approaches focussing on manuscript studies, semantics and (textual) communication.

New research into medieval women from the Anglo-Saxon to the late medieval period demonstrates their energy, defiance and wit.

New York Medical

Journal Routledge

“An ethical and accessible introduction to a historical period often implicated in racist narratives of nationalism and imperialism.” —Sierra

Lomuto, Assistant Professor of Global Medieval Literature, Rowan University A

collection of twenty-two

essays, *Whose Middle*

Ages? gives nonspecialists access to the richness of

our historical knowledge while debunking damaging misconceptions about the medieval past.

Myths about the medieval period are especially beloved among the globally resurgent far right, from crusading emblems on the shields borne by alt-right

demonstrators to the on-screen image of a purely white European populace defended from actors of color by Internet trolls.

This collection attacks these myths directly by insisting that readers encounter the relics of the Middle Ages on their own terms. Each essay uses its author’s academic

research as a point of entry and takes care to explain how the author knows what she or he knows and what kinds of tools, bodies of evidence, and theoretical lenses

allow scholars to write with certainty about elements of the past to a level of detail that might seem unattainable. By demystifying the methods of scholarly inquiry,

Whose Middle Ages? serves as an antidote not only to the far right’s errors of fact and interpretation but also to its assault on scholarship and expertise as valid means for the acquisition of knowledge. “In

example after example, the authors show how people shape the Middle Ages to reflect their fears and dreams for themselves and for society. The results range from the amusing to the horrifying, from video games to genocide.

Whose Middle Ages?

Everyone’s, but not everyone’s in the same way.” —Michelle R.

Warren, author of *Creole Medievalism*

The variety of experience available to medieval scholars and the vitality of medieval thought are both reflected in this collection of original essays by distinguished historians. *Intellectual Life in the Middle Ages* is presented to Margaret Gibson, whose own work has ranged from Boethius to Lanfranc and to the study of the Bible in the middle ages.

Logic and Language in the Middle Ages Routledge
Between 1100 and 1600, the emphasis on reason in the learning and intellectual life of Western Europe became more pervasive and widespread than ever before in the history of human civilization. Of crucial significance was the invention of the university around 1200, within which reason was institutionalized and where it became a deeply embedded, permanent feature of Western thought and culture. It is therefore appropriate to speak of an Age of Reason in the Middle Ages, and to view it as a forerunner and herald of the Age of Reason that was to come in the seventeenth century. The object of this study is twofold: to describe how reason was manifested in the curriculum of medieval universities, especially in the subjects of logic, natural philosophy and theology; and to explain how the Middle Ages acquired an undeserved reputation as an age of superstition, barbarism, and unreason.

Physicist, mathematician, and logician Charles S. Peirce (1839-1914) was

America's first internationally recognized philosopher, the man who created the concept of pragmatism, popularized by William James. Charles S. Peirce: The Essential Writings is a comprehensive collection of the philosopher's writings including: Questions Concerning Certain Faculties Claimed for Man (1868), which outlines his theory of knowledge; a review of the works of George Berkeley; papers from between 1877 and 1905 developing the ground of pragmatism and Peirce's theory of scientific inquiry; his basic concept of metaphysics (1891-93); and the important 1902 articles in Baldwin's dictionary on his later pragmatism (or pragmaticism), uniformity, and synechism. Also included are Peirce's well-known essays: The Fixation of Belief, and How to Make Our Ideas Clear. *Catalogue of the educational division of the South Kensington museum* BRILL

essential writing skills. Seven against Christ BRILL
Dreams and visions played important roles in the Christian cultures of the early middle ages. But not only did tradition and authoritative texts teach that some dreams were divine: some also pointed out that this was not always the case. Exploring a broad range of narrative sources and manuscripts, Jesse Keskiaho investigates how the teachings of Augustine of Hippo and Pope Gregory the Great on dreams and visions were read and used in different contexts. Keskiaho argues that the early medieval processes of reception in a sense created patristic opinion about dreams and visions, resulting in a set of authoritative ideas that could be used both to defend and to question reports of individual visionary experiences. This book is a major contribution to discussions about the intellectual place of dreams and visions in the early middle ages, and underlines the creative nature of early medieval engagement with authoritative texts. God and Reason in the Middle Ages Brepols Pub
This volume, containing a

selection of essays from ACMRS's 1996 conference, reflects a broad range of interests in medieval and Renaissance studies. Although most of the eleven essays address western European topics, one essay deals with Byzantine political and theological history, and one touches on Arabic poetry in medieval Sicily. The chronological range is also broad, extending from the seventh to the twentieth century and including topics from an early Byzantine polemicist to the recent growing interest in medievalism, and from critical readings of early texts to implications of computer technology for future manuscript study. In some significant ways the volume continues earlier discussions of the state of the profession, such as those in William D. Paden (ed.), *The Future of the Middle Ages*, and John Van Engen (ed.), *The Past and Future of Medieval Studies*. More generally, this second volume in the ASMAR series extends the theme of the first, *Reinventing the Past*, and makes fresh contributions to the scholarship on a number of problems. If the current volume provides a reliable gauge

for the future of medieval and Renaissance studies, we are on the verge of new beginnings, increasingly outward-looking, reexamining and redefining old boundaries to reach a new and sharpened understanding of the past.

In this invigorating collection of essays by leading medieval historians, the issue of laity—primarily the ideas and attitudes of lay people—are examined, as expressed in legal cases, charters, chronicles, and collective activities. The contributors focus on narratives from the Middle Ages, during a period of progress from irrational to rational thought. The essays range chronologically and geographically from the 7th to the 16th century, and from West Britain to Papal and urban Italy. *Western Civilization: Alternate Volume: Since 1300* Prometheus Books "These essays explore unfamiliar topics, reveal the vitality of the past, investigate the basic concerns of mankind, and re-evaluate the meaning of medieval history for the modern world."--Book jacket.

People, Power and Identity in the Late Middle Ages Fordham University Press
 This important and overdue book examines illuminated manuscripts and other book arts of the Global Middle Ages. Illuminated manuscripts and illustrated or decorated books—like today’s museums—preserve a rich array of information about how premodern peoples conceived of and perceived the world, its many cultures, and everyone’s place in it. Often a Eurocentric field of study, manuscripts are

prisms through which we can glimpse the interconnected global history of humanity. *Toward a Global Middle Ages* is the first publication to examine decorated books produced across the globe during the period traditionally known as medieval. Through essays and case studies, the volume’s multidisciplinary contributors expand the historiography, chronology, and geography of manuscript studies to embrace a diversity of objects, individuals, narratives, and materials from Africa, Asia, Australasia, and the Americas—an approach that both engages with and contributes to the emerging field of scholarly inquiry known as the Global Middle Ages. Featuring more than 160 color illustrations, this wide-ranging and provocative collection is intended for all who are interested in engaging in a dialogue about how books and other textual objects contributed to world-making strategies from about 400 to 1600.
